

**Description**

The IIS returns a positive acknowledgement message indicating that no errors were found during the course of filing the message.

**Comments**

No Comments

**Pre-condition**

A VXU message is generated by the EHR.

**Post-Condition**

No PostCondition

**Test Objectives**

No Test Objectives

**Evaluation Criteria**

The acknowledgement message is consumed by the system responsible for the content of the administration message without error.

**Notes**

**Important note regarding the MSH-10 and MSA-2:** The NIST acknowledgment message is predefined and is based on the VXU message. Most systems will automatically create the message control Identifier and may require it for importing, linking, and processing the ACK message. The NIST ACK test message can be modified such that MSA-2 matches MSH-10 of the VXU message generated by the system-under test.
