Pre-condition

Juana Maria Gonzales Initial Data Load completed.

Post-Condition

Juana Maria Gonzales is the active working patient in the EHR.

Test Objectives

Select New Patient: The EHR or other clinical software system must allow a user to distinguish information about patients with similar names or identifying information in order to select the right patient from the providers' EHR or other clinical software. This information is crucial for identifying and selecting the correct patient. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar sounding names. In order to match patients with those already in the immunization registry, the EHR or other clinical software should have the ability to record the mother's maiden name, whether the patient was part of a multiple birth, and if so, the order of birth (when such information is available). The provider should be aware of how often the protection indicator information must be updated based on local rules.

Evaluation Criteria

Tester shall verify that the product can distinguish Juana Maria Gonzales from similar sounding names and her twin using all of the pediatric demographics:

| | |
|--|--|
| Patient ID (previously listed as “Medicaid Number”) | Vendor supplied |
