

Description

This provides the details for vaccine products that should exist in the system under test before testing scenarios are performed.

This IIP test plan tests clients with NDC as the primary code set and CVX as an alternate code set. Please note that this configuration may vary among jurisdictions. NDC is required for all new administrations and CVX for historical but can include NDC if known.

Notes

This activity is not performed under proctor observation.

If unable to enter expired vaccination product please alert the proctor.

This was an attestation item-previously attested to.

Jurisdictions will individually determine if the Unit of Use or Unit of Sale NDC will be used when submitting vaccines to their IIS. This plan uses the Unit of Use NDC.
