

Description

The IIS returns a positive acknowledgement message indicating that no errors were found during the course of filing the message.

Comments

No Comments

Pre-condition

A VXU message is generated by the EHR.

Post-Condition

No PostCondition

Test Objectives

No Test Objectives

Evaluation Criteria

The acknowledgement message is consumed by the system responsible for the content of the administration message without error.

Notes

Important note regarding the MSH-10 and MSA-2: The NIST acknowledgment message is predefined and is based on the VXU message. Most systems will automatically create the message control Identifier and may require it for importing, linking, and processing the ACK message. The NIST ACK test message can be modified such that MSA-2 matches MSH-10 of the VXU message generated by the system-under test.
