HIMSS Immunization Integration Program CDC Test Plan v8.1

This test plan is to be used for the testing of the HIMSS Immunization Integration Program: Immunization- Related Capabilities and Guidance developed under Contract-No: 200-2013-55961. All test cases are required to be executed. The test plan includes both functional and interoperability tests including Vaccine Update Notifications (HL7 V2.5.1 VXU/Z22) and Query and Response (Evaluated History and Forecast Group Z44/Z42). This version is updated for use in the 2019/2020 test cycle. It is aligned with ONC 2015 Certification Criteria for § 170.315(f) (1) Transmission to Immunization Registries. This test plan is approved by ONC to demonstrate conformance to these criteria. This interim release includes • additional clarification in the notes offering additional guidance regarding variations such as: o Forecasting variation relating to patient age at the time the test is run o Clarification that the 11-digit NDC code with dashes is required, • updates to products reflecting those available at the time of the documented vaccine, primarily for influenza vaccines with frequent product changes, • date corrections to align the message content with the test instructions • administration site corrections to align the message content with the test instructions • added testing for the requirement to Produce Vaccine History Report

Test Story

Pre-condition
Post-Condition
Test Objectives
Evaluation Criteria
Notes

1. Initial Data Load

The initial data load will consist of the vendor entering data during live interactive testing for 4 patients with various scenarios. The data entry will include demographic data, Immunization histories and specific conditions for each patient. The initial data load will also populate the inventory used in the use case.

Test Story

Description
Comments
Pre-condition
Post-Condition
Test Objectives
Evaluation Criteria
Notes

1.1. Juana Mariana Vazquez Initial Data Load

Demonstrates the ability to record pediatric demographic data, historical vaccinations, and clinical conditions for a school-aged child Juana Mariana Vazquez. There are no transactions associated with this test case.

Test Story

Description

The practice site for the scenario is Shoreline Pediatrics. The EHR vendor loads demographic data and clinical history for Juana Mariana Vazquez. The data includes immunizations provided by the practice.

The vendor also enters:

-Two vaccines administered at other sites

1. an influenza vaccine given at a local pharmacy
 2. an inactivated polio vaccine given elsewhere and not reported to the registry - the history includes an adverse reaction (febrile seizure) 8 hours after the vaccine was administered
- Adverse reaction to inactivated polio vaccine (febrile seizure) and the date and source of information

NOTE: the historical vaccines will be imported during the Registry query (e.g. from another practice).

Comments

Set-up step evaluating EMR functions for capturing and storing patient pediatric demographic data, historical immunizations, and clinical conditions. There is no transaction associated with this test step.

Pre-condition

No Pre-Condition

Post-Condition

The EMR has recorded all of the pediatric demographic data, historical immunizations, and clinical conditions in the record created for Juana Mariana Vazquez using the test data provided.

Test Objectives

Register New Patients: The system must allow a user to enter distinguishing information about patients so that providers can uniquely identify patients who have similar sounding names or other similar identifying information. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar names. EHRs or other clinical software must be able to store information to successfully match with patients in immunization registries, if the information is available. Specific to immunization registries, that information includes the mother's maiden name, whether the patient was part of a multiple birth, and the birth order (i.e., ordinal number of birth, first, second, etc.). This information allows the provider to correctly identify the patient and also helps ensure a match when the EHR sends the patient's information to external systems such as an immunization registry.

Record Past Immunizations: The EHR or other clinical software system allows providers to enter information about immunizations given elsewhere (e.g., by another doctor, at a public health clinic, pharmacy, etc.) with incomplete details.

Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry.

Supporting data for:

Compare Public Health Immunization Registry (IIS) Immunization History to EHR Immunization History: The public health immunization registry has returned the requested immunization history for a patient (Return Evaluated Immunization History and Forecast (Z42) – HL7 Version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5). The EHR is able to display the evaluated immunization history received from the registry as well as the immunization history already present in the EHR so that a user can compare them. The EHR provides a way for the provider to view both histories, determine what is different (if anything), and update the existing EHR immunization history with new information from the public health registry if he or she chooses to do so. The system must store the new information as structured data as part of the patient's local immunization history and include the time of the update and the source of the new information.

Identify Adverse Event: The EHR or other clinical software system enables capture of structured data regarding adverse events.

Evaluation Criteria

Evaluation criteria is defined within each test step.

Notes

No Note

1.1.1. Enter Initial Demographic Data for New Patient Juana Mariana Vazquez

Test Step Type: SUT_MANUAL

Juana Mariana Vazquez is entered as a patient in the EMR, including all pediatric demographic information.

Test Story

Description

The EHR vendor loads demographic data for Juana Mariana Vazquez.

Comments

Set-up step evaluating EMR functions for capturing and storing patient pediatric demographic data. There is no transaction associated with this test step.

Pre-condition

No Pre-Condition

Post-Condition

The EMR has recorded all of the pediatric demographic in the record created for Juana Mariana Vazquez.

Test Objectives

Register New Patients: The system must allow a user to enter distinguishing information about patients so that providers can uniquely identify patients who have similar sounding names or other similar identifying information. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar names. EHRs or other clinical software must be able to store information to successfully match with patients in immunization registries, if the information is available. Specific to immunization registries, that information includes the mother's maiden name, whether the patient was part of a multiple birth, and the birth order (i.e., ordinal number of birth, first, second, etc.). This information allows the provider to correctly identify the patient and also helps ensure a match when the EHR sends the patient's information to external systems such as an immunization registry.

Evaluation Criteria

Evaluation Criteria: Vendor successfully records all demographic data provided, and in particular (Mother's maiden name, multiple birth, birth order), with all required attributes indicated by [Y]. The code values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the specified coded value when the attribute is conveyed in later transaction messages.

For systems that document VFC eligibility at the patient level: VFC Eligible

Patient ID (previously listed as "Medicaid Number")	Vendor supplied	Y
Patient ID: Assigning Authority ID (i.e., owning source)/Facility Name	Shoreline Pediatrics	Y
Patient ID: Type (e.g., medical record number, IIS ID)	Vendor supplied	Y
Patient Name: First	Juana	Y
Patient Name: Middle	Mariana	Y
Patient Name: Last	Vazquez	Y
Patient Date of Birth	11/01/2014	Y
Birth Time	11:05	N
Patient Gender (Administrative Sex)	F	Y
Patient Multiple Birth Indicator	No	Y
Patient Birth Order	NA	C
Responsible Person Name: First	Joanna	Y
Responsible Person Name: Middle	Merida	Y
Responsible Person Name: Last	Vazquez	Y
Responsible Person Name: Relationship to Patient	Grandmother	Y
Mother's Name: First	Maria	Y
Mother's Name: Middle	Merida	Y
Mother's Name: Last	Vazquez	Y
Mother's Name: Maiden Last	Acosta	Y
Patient Address: Street	4345 Standish Way	Y
Patient Address: City	Stamford	Y
Patient Address: State	CT	Y
Patient Address: Country	USA	Y

Patient Telephone Number Type (e.g., home, cell)	cell	Y
Patient E-mail Address	jmg@gmail.com	N
Publicity Code	Reminder/recall - any method (02 HL70215)	Y
Protection Indicator	N	Y
Protection Indicator Effective Date	NA	N
Immunization Registry Status	NA	N
Preferred Contact Method	Phone	Y

Notes

Publicity Code is included in order to support documentation of communication method for the TestCaseGroup:Cohort Report. If the EMR does not support this attribute, the result for this step may indicate pass, but the lack of support should be documented as a notable exception.

The date/time of birth for the twins includes birth time. This aids in distinguishing the birth order for multiple births. Since this patient is not a multiple birth, the vendor can pass with notable exception if the birth date/time does not include precision of birth time. The notable exception should document the lack of support for birth time.

While the PID indicates that it is Vendor Supplied, the ID returned from the registry query is:

123456^^^MYEHR^MR~987633^^^MYIIS^SR. The IIS will not know the PID of the local system, and there is no context-based validation checking for the PID.

1.1.2. Enter Initial Immunization Data for Juana Mariana Vazquez: Immunizations from practice

Test Step Type: SUT_MANUAL

Patient History from the local practice is entered into the EMR.

Test Story

Description

The EHR vendor loads immunization history data from the local practice for Juana Mariana Vazquez. This includes an MMR dose that was given too early. This MMR dose serves to seed checking for dose given too early in TestCaseGroup: Juana Mariana Vazquez Visit, TestCase: Query the Registry for Juana Mariana Vazquez, TestStep: Mark first MMR Dose as Invalid.

Comments

No Comments

Pre-condition

The EMR has recorded all of the pediatric demographic data in the record created for Juana Mariana Vazquez.

Post-Condition

The EMR has recorded all of the pediatric demographic data in the record created for Juana Mariana Vazquez.

Test Objectives

Record Past Immunizations: The EHR or other clinical software system allows providers to enter information about immunizations given elsewhere (e.g., by another doctor, at a public health clinic, pharmacy, etc.) with incomplete details.

Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry.

Supporting data for:

Compare Public Health Immunization Registry (IIS) Immunization History to EHR Immunization History: The public health immunization registry has returned the requested immunization history for a patient (Return Evaluated Immunization History and Forecast (Z42) – HL7 Version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5). The EHR is able to display the evaluated immunization history received from the registry as well as the immunization history already present in the EHR so that a user can compare them. The EHR provides a way for the provider to view both histories, determine what is different (if anything), and update the existing EHR immunization history with new information from the public health registry if he or she chooses to do so. The system must store the new information as structured data as part of the patient's local immunization history and include the time of the update and the source of the new information.

Receive Dose Not Indicated Alert for Single Vaccine Order: The EHR or other clinical software system notifies the provider in instances when there are single or combination vaccine orders that are inconsistent with the expected timing intervals included in the vaccine forecast. Inconsistencies include suggestion of different date(s) for ordering the vaccine(s) or indication the vaccine(s) is/are no longer required.

Evaluation Criteria

Evaluation Criteria: Vendor successfully records all immunization data known to the local practice as provided, with all required attributes indicated by [Y]. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

Notes

The MMR dose serves to seed checking for dose given too early in TestCaseGroup: Juana Mariana Vazquez Visit, TestCase: Query the Registry for Juana Mariana Vazquez, TestStep: Mark first MMR Dose as Invalid.

The EMR does not need to specify a 'new immunization', as long as there is a way to indicate that it is a new immunization within the EMR, this is acceptable (e.g. the default interpretation of the data entry is that it is a new immunization and not historical).

1.1.3. Enter Initial Immunization Data for Juana Mariana Vazquez from Another Practice

Test Step Type: SUT_MANUAL

Patient History from another practice is entered into the EMR.

Test Story

Description

The EHR vendor loads immunization history data from another practice into the record for Juana Mariana Vazquez.

Comments

No Comments

Pre-condition

The EMR has recorded all of the pediatric demographic data in the record created for Juana Mariana Vazquez.

Post-Condition

The immunization history from another practice is loaded into the record created for Juana Mariana Vazquez.

Test Objectives

Record Past Immunizations: The EHR or other clinical software system allows providers to enter information about immunizations given elsewhere (e.g., by another doctor, at a public health clinic, pharmacy, etc.) with incomplete details.

Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry.

Supporting data for:

Compare Public Health Immunization Registry (IIS) Immunization History to EHR Immunization History: The public health immunization registry has returned the requested immunization history for a patient (Return Evaluated Immunization History and Forecast (Z42) – HL7 Version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5). The EHR is able to display the evaluated immunization history received from the registry as well as the immunization history already present in the EHR so that a user can compare them. The EHR provides a way for the provider to view both histories, determine what is different (if anything), and update the existing EHR immunization history with new information from the public health registry if he or she chooses to do so. The system must store the new information as structured data as part of the patient's local immunization history and include the time of the update and the source of the new information.

Evaluation Criteria

Evaluation Criteria: Vendor successfully records all immunization history data from another practice as provided, with all required attributes indicated by [Y]:

Historical Vaccine from Another Practice - DTaP

Notes

No Note

1.1.4. Enter Initial Immunization Data for Juana Mariana Vazquez Reported by Parent

Test Step Type: SUT_MANUAL

Patient History from a pharmacy as reported by the parent is entered into the EMR.

Test Story

Description

The provider enters immunization data from a pharmacy as reported by the parent for Juana Mariana Vazquez.

Comments

No Comments

Pre-condition

The EMR has recorded all of the pediatric demographic data in the record created for Juana Mariana Vazquez.

Post-Condition

The immunization history from the pharmacy as reported by the parent is loaded into the record created for Juana Mariana Vazquez.

Test Objectives

Record Past Immunizations: The EHR or other clinical software system allows providers to enter information about immunizations given elsewhere (e.g., by another doctor, at a public health clinic, pharmacy, etc.) with incomplete details.

Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry.

Supporting data for:

Compare Public Health Immunization Registry (IIS) Immunization History to EHR Immunization History: The public health immunization registry has returned the requested immunization history for a patient (Return Evaluated Immunization History and Forecast (Z42) – HL7 Version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5). The EHR is able to display the evaluated immunization history received from the registry as well as the immunization history already present in the EHR so that a user can compare them. The EHR provides a way for the provider to view both histories, determine what is different (if anything), and update the existing EHR immunization history with new information from the public health registry if he or she chooses to do so. The system must store the new information as structured data as part of the patient's local immunization history and include the time of the update and the source of the new information.

Evaluation Criteria

Evaluation Criteria: Vendor successfully records all immunization history data from the pharmacy as provided by the parent with all required attributes indicated by [Y]:

Historical Vaccine from Pharmacy Reported by Parent		
Entered BY	Sandra Molina	Y
Ordering Provider	Gina Ricci	N
Entering Organization	Shoreline Pediatrics	Y
Vaccine Event information source (Administration Notes)	Historical information - from parent's written record (NIP001 03)	Y
Value/Text for Vaccine Type	Influenza vaccine	Y
Date/Time of Start of Administration	10/15/2018	Y
Vaccine Administered	Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) FLUZONE QUADRIVALENT (NDC 49281-0518-00))	Y
Administered Amount (of Vaccine)	0.25	Y
Administered Units (of Measure)	mL	Y
Administering Provider	Gina Ricci	N
Administered-at Location	Oceanview Pharmacy, 15 Post Road, Stamford Connecticut 06901	Y

1.2. Juan Marcel Marina Initial Data Load

Demonstrates the ability to record pediatric demographic data, historical vaccinations, and clinical conditions for 1 1/2-year old Juan Marcel Marina. There are no transactions associated with this test case.

Test Story

Description

The practice site for the scenario is Shoreline Pediatrics. The EHR vendor loads demographic data and clinical history for Juan Marcel Marina. The data includes a clinical history of varicella, and serological evidence of Hepatitis A immunity.

Comments

Set-up step evaluating EMR functions for capturing and storing patient pediatric demographic data, historical immunizations, and clinical conditions. There is no transaction associated with this test step.

Pre-condition

No Pre-Condition

Post-Condition

The EMR has recorded all of the pediatric demographic data, historical immunizations, and clinical conditions in the record created for Juan Marcel Marina using the test data provided.

Test Objectives

Register New Patients: The system must allow a user to enter distinguishing information about patients so that providers can uniquely identify patients who have similar sounding names or other similar identifying information. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar names. EHRs or other clinical software must be able to store information to successfully match with patients in immunization registries, if the information is available. Specific to immunization registries, that information includes the mother's maiden name, whether the patient was part of a multiple birth, and the birth order (i.e., ordinal number of birth, first, second, etc.). This information allows the provider to correctly identify the patient and also helps ensure a match when the EHR sends the patient's information to external systems such as an immunization registry.

Supporting data for:

Modify Antigen Recommendations Based on Active Diagnoses: The system notifies the provider of any conflicts between recommended vaccines in the updated forecast and the patient's current or historical diagnoses.

Evaluation Criteria

Evaluation criteria is defined within each test step.

Notes

No Note

1.2.1. Enter Initial Demographic Data for New Patient Juan Marcel Marina

Test Step Type: SUT_MANUAL

Juan Marcel Marina is entered as a patient in the EMR, including all pediatric demographic information.

Test Story

Description

The EHR vendor loads demographic data for Juan Marcel Marina.

Comments

Set-up step evaluating EMR functions for capturing and storing patient pediatric demographic data. There is no transaction associated with this test step.

Pre-condition

No Pre-Condition

Post-Condition

The EMR has recorded all of the pediatric demographic in the record created for Juan Marcel Marina.

Test Objectives

Register New Patients: The system must allow a user to enter distinguishing information about patients so that providers can uniquely identify patients who have similar sounding names or other similar identifying information. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar names. EHRs or other clinical software must be able to store information to successfully match with patients in immunization registries, if the information is available. Specific to immunization registries, that information includes the mother's maiden name, whether the patient was part of a multiple birth, and the birth order (i.e., ordinal number of birth, first, second, etc.). This information allows the provider to correctly identify the patient and also helps ensure a match when the EHR sends the patient's information to external systems such as an immunization registry.

Evaluation Criteria

Evaluation Criteria: Vendor successfully records all demographic data provided, and in particular (Mother's maiden name, multiple birth, birth order), with all required attributes indicated by [Y]. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

For systems that document VFC eligibility at the patient level: Not VFC Eligible

Patient ID (previously listed as "Medicaid Number")	Vendor supplied	Y
Patient ID: Assigning Authority ID (i.e., owning source)/Facility Name	Shoreline Pediatrics	Y
Patient ID: Type (e.g., medical record number, IIS ID)	Vendor supplied	Y
Patient Name: First	Juan	Y
Patient Name: Middle	Marcel	Y
Patient Name: Last	Marina	Y
Patient Date of Birth	03/04/2018	Y
Birth Time	11am	N

Publicity Code	Reminder/recall - no calls (03 HL70215)	Y
Protection Indicator	No	Y
Protection Indicator Effective Date	NA	N
Immunization Registry Status	NA	N
Preferred Contact Method	Text	Y

Notes

Publicity Code is included in order to support documentation of communication method for the TestCaseGroup:Cohort Report. If the EMR does not support this attribute, the result for this step may indicate pass, but the lack of support should be documented as a notable exception.

The date/time of birth for the twins includes birth time. This aids in distinguishing the birth order for multiple births. Since this patient is not a multiple birth, the vendor can pass with notable exception if the birth date/time does not include precision of birth time. The notable exception should document the lack of support for birth time.

While the PID indicates that it is Vendor Supplied, the ID returned from the registry query is:

123456^~^MYEHR^MR~987633^~^MYIIS^SR. The IIS will not know the PID of the local system, and there is no context-based validation checking for the PID.

1.2.2. Enter Clinical History for Juan Marcel Marina

Test Step Type: SUT_MANUAL

The EHR captures structured data regarding a problem of congenital asplenia as part of the clinical history.

Test Story

Description

The clinical history of Chicken Pox (Varicella) is documented in the record created for Juan Marcel Marina.

The lab tests show serologic immunity to Hep A and a finding is added indicating Hepatitis A Immune.

Comments

No Comments

Pre-condition

The EMR has recorded all of the pediatric demographic in the record created for Juan Marcel Marina.

Post-Condition

The clinical history of the Varicella is documented in the record created for Juan Marcel Marina.

The serologic immunity (Hepatitis A virus IgG+IgM Ab [Presence] in Serum) - result positive and a finding of Hepatitis A Immune is documented in the record for Juan Marcel Marina.

Test Objectives

Supporting data for:

Modify Antigen Recommendations Based on Active Diagnoses: The system notifies the provider of any conflicts between recommended vaccines in the updated forecast and the patient's current or historical diagnoses.

Note: In this case, the vaccine is not recommended due to the history of the vaccine preventable condition (Varicella).

Evaluation Criteria

Evaluation Criteria: Vendor successfully records all clinical history data provided with all required attributes indicated by [Y]. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

Serologic Evidence of Immunity to Hepatitis A is documented in the record:

Lab Result and Finding (1/15/2019):

LOINC 51913-2 Hepatitis A virus IgG+IgM Ab [Presence] in Serum - result positive.

Finding of Hepatitis A Immunity is recorded (SNOMED 278971009 Hepatitis A Immune (finding)).

History of Varicella (reason for vaccine forecast to not indicate varicella vaccine due)		
Problem (3/16/2019)	Varicella (disorder) SNOMED-CT 38907003); Varicella without complication - (ICD-10-CM B01.9) Coded Value expected using SNOMED-CT or ICD-10-CM	Y

Notes

Protection Indicator Effective Date may use current date if constrained by EMR workflow.

Document in notable exceptions where Birth Address can not be captured/recorded by product.

1.5. Enter Inventory

Demonstrates the ability to enter and update inventory with stock received.

Test Story

Description
The provider enters vaccine inventory data from available inventory.
Comments
2-D data matrix codes are provided as an option to enter the inventory.
Pre-condition
No Pre-Condition
Post-Condition
Vaccine inventory is recorded and available in the EMR.
Test Objectives
Update Vaccine Inventory from Stock Receipt: The EHR or other clinical software system updates the vaccine inventory when new stock is received at the site and updates the correct count of each vaccine, including those for use in guarantee programs (such as Vaccines for Children) and for private stock.
Display Available Vaccine Antigens: The system presents a list of vaccine antigens available for administration to patients (i.e., private stock vs. specific guarantee program).
Evaluation Criteria
Evaluation criteria is defined within each test step.
Notes
Vendors are encouraged to scan the 2-D data matrix images as data input. Tester should document feedback and any identified issues with 2-D data matrix images.

1.5.1. Enter Vaccine Inventory

Test Step Type: SUT_MANUAL

Demonstrates the ability to enter and update inventory with stock received.

Test Story

Description

The provider receives a vaccine delivery and records the new vaccine data in available inventory.

Comments

Set-up step evaluating EMR functions for capturing and storing vaccine inventory data.

Pre-condition

No Pre-Condition

Post-Condition

Vaccine inventory is recorded and available in the EMR.

Test Objectives

Update Vaccine Inventory from Stock Receipt: The EHR or other clinical software system updates the vaccine inventory when new stock is received at the site and updates the correct count of each vaccine, including those for use in guarantee programs (such as Vaccines for Children) and for private stock.

Evaluation Criteria

Vendor successfully records all vaccine inventory data provided:

1.

Manufacturer:	Sanofi Pasteur Inc.
NDC:	NDC:49281-0519-00
Product Name:	FLUZONE QUADRIVALENT

1.5.2. View Inventory

Test Step Type: SUT_MANUAL

Demonstrates the ability to enter and update inventory with stock received.

Test Story

Description

The provider reviews the full list of vaccine inventory.

Comments

No Comments

Pre-condition

Inventory has been entered into the EMR.

Post-Condition

The list of available inventory is displayed.

Test Objectives

Display Available Vaccine Antigens: The system presents a list of vaccine antigens available for administration to patients (i.e., private stock vs. specific guarantee program).

Evaluation Criteria

The EMR inventory shows (minimally):

1.

Manufacturer:	Sanofi Pasteur Inc.
NDC:	49281-0519-00
Product Name:	FLUZONE QUADRIVALENT
Lot#:	8L4B3521
Expiration Date:	12/31/2020
GTIN:	00349281519000
Vaccine source:	VFC
Quantity:	12 Vials

2.

Manufacturer:	Sanofi Pasteur Inc.
NDC:	49281-0519-00
Product Name:	FLUZONE QUADRIVALENT
Lot#:	D8043IN8422
Expiration Date:	12/31/2020
GTIN:	00349281519000
Vaccine source:	VFC
Quantity:	15 Vials (or doses)

3.

Manufacturer:	Sanofi Pasteur Inc.
NDC:	49281-0519-00
Product Name:	FLUZONE QUADRIVALENT
Lot#:	D8043IN8855
Expiration Date:	12/31/2020

GTIN:	00349281519000
Vaccine source:	Non-VFC
Quantity:	12 Vials (or doses)

4.

Manufacturer:	GlaxoSmithKline Biologicals SA
NDC:	58160-0820-43
Product Name:	ENGERIX-B
Lot#:	6332FK18
Expiration Date:	6/15/2019
GTIN:	10358160820431
Vaccine source:	Non-VFC
Quantity:	18 Syringes (or doses)

5.

Manufacturer:	GlaxoSmithKline Biologicals SA
NDC:	58160-0820-43
Product Name:	ENGERIX-B
Lot#:	6332FK26
Expiration Date:	12/31/2020
GTIN:	10358160820431
Vaccine source:	Non-VFC
Quantity:	20 Syringes (or doses)

6.

Manufacturer:	GlaxoSmithKline Biologicals SA
NDC:	58160-0811-43
Product Name:	Pediarix
Lot#:	6559FK32
Expiration Date:	12/31/2020
GTIN:	10358160811439
Vaccine source:	Non-VFC
Quantity:	16 Syringes (or doses)

Notes

Tester should document how quantity is displayed and what is present (e.g. volume, # doses).

2. Juana Mariana Vazquez Visit

Juana Mariana Vazquez visits the provider where her immunization history is retrieved from the registry and reconciled with the local information in the medical record to determine vaccines that are due. Vaccinations are ordered and administered. The parents refuse the Polio vaccine due to prior issues. The vaccines are reported to the immunization registry and a vaccine summary is available for the patient.

Notes

2.1. Query the Registry for Juana Mariana Vazquez

EMR generates a Z44 query to the Immunization Registry to retrieve the Evaluated History and Forecast for Juana Mariana Vazquez. The Z42 response is used to display, reconcile, and update the immunization information in the EMR.

Test Story

Description

The EMR generates a Z44 query to the Immunization Registry to retrieve the Evaluated History and Forecast for Juana Mariana Vazquez.

Querying the registry will consist of the vendor creating Z44 messages for Juana Mariana Vazquez to be sent to the registry. The response will be processed as part of the 'Display, Reconcile, Import and Update Immunization Information' activity.

Using the Z42 Response to Immunization Registry Query, the EMR displays the Evaluated History and Forecast to the user for reconciliation and update. The vendor will receive information back from the registry and show the ability to view and reconcile, and import the information returned by the registry (NOTE: the Z42 message will be provided either manually, or as part of the tool). This test will also look at the system's ability to view the forecast returned by the registry and create a new forecast after reconciling the information.

Comments

No Comments

Pre-condition

Juana Mariana Vazquez is entered as a patient in the EMR with complete Demographic data, Immunization History Data, and Clinical Data according to the steps in the 'Juana Mariana Vazquez Initial Data Load.'

Post-Condition

A Z44 Query is generated and submitted to the Immunization Registry/Test tool, and a Z42 response is returned.

Test Objectives

Select New Patient: The system must allow a user to distinguish information about patients with similar names or identifying information in order to select the right patient from the providers' EHR or other clinical software. This information is crucial for identifying and selecting the correct patient. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar sounding names. In order to match patients with those already in the immunization registry, the EHR or other clinical software should have the ability to record the mother's maiden name, whether the patient was part of a multiple birth, and if so, the order of birth (when such information is available). The provider should be aware of how often the protection indicator information must be updated based on local rules.

Request/Receipt of Patient Immunization History: The system sends a request to the public health immunization registry "on demand," or in advance for those with scheduled appointments. The request includes the identifying information the immunization registry needs to match each patient with those in the registry including, if present, the mother's maiden name, a multiple birth indicator, and the birth order. The request also is sent in a pre-determined format the registry can read and interpret (Request Evaluated Immunization History and Forecast (Z44) - HL7 version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5).

Compare Public Health Immunization Registry (IIS) Immunization History to EHR Immunization History: The public health immunization registry has returned the requested immunization history for a patient (Return Evaluated Immunization History and Forecast (Z42) – HL7 Version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5). The EHR is able to display the evaluated immunization history received from the registry as well as the immunization history already present in the EHR so that a user can compare them. The EHR provides a way for the provider to view both histories, determine what is different (if anything), and update the existing EHR immunization history with new information from the public health registry if he or she chooses to do so. The system must store the new information as structured data as part of the patient's local immunization history and include the time of the update and the source of the new information.

Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry.

View Immunization Forecast: The system provides a view of the immunization forecast provided by the IIS. The display includes the recommended vaccines and their associated dates (e.g., earliest, recommended, past due, latest) for each vaccine included in the forecast.

View Reconciled Immunization Forecast: The EHR or other clinical software system has the ability to re-evaluate and update the immunization forecast using a patient's newly updated immunization history. Forecasts are updated following reconciliation of immunization data contained in the public health immunization registry with immunization data contained in the EHR. Processing the new forecast can be internal to the EHR or it can use an external forecasting service, but should reference the most recent recommendations.

Review Patient Immunization History: The EHR or other clinical software systems displays vaccine history by vaccine series.

Record Past Immunizations: The EHR or other clinical software system allows providers to enter information about immunizations given elsewhere (e.g., by another doctor, at a public health clinic, pharmacy, etc.) with incomplete details.

Support for:

Receive Dose Not Indicated Alert for Single Vaccine Order: The EHR or other clinical software system notifies the provider in instances when there are single or combination vaccine orders that are inconsistent with the expected timing intervals included in the vaccine forecast. Inconsistencies include suggestion of different date(s) for ordering the vaccine(s) or indication the vaccine(s) is/are no longer required.

Evaluation Criteria

Evaluation criteria is defined within each test step.

Notes

No Note

2.1.1. Select Patient Juana Mariana Vazquez

Test Step Type: SUT_MANUAL

Select patient Juana Mariana Vazquez, distinguishing the patient from other patients with similar demographics (similar names).

Test Story

Description																						
Juana Mariana Vazquez is selected as the patient and her record is opened in the EMR.																						
Comments																						
No Comments																						
Pre-condition																						
Juana Mariana Vazquez Initial Data Load completed.																						
Post-Condition																						
Juana Mariana Vazquez is the active working patient in the EMR.																						
Test Objectives																						
<p>Select New Patient: The system must allow a user to distinguish information about patients with similar names or identifying information in order to select the right patient from the providers' EHR or other clinical software. This information is crucial for identifying and selecting the correct patient. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar sounding names. 2.1.2. Query Registry for vaccination history and forecast for Juana Mariana Vazquez

Test Step Type: SUT_INITIATOR

The EMR generates a Z44 query for immunization history and forecast correctly and without omission according to supplied test data.

Test Story

Description
The provider uses the EMR to query the Immunization Registry for an Evaluated History and Forecast based on information known to the Immunization Registry.
Comments
No Comments
Pre-condition
Juana Mariana Vazquez Initial Data Load is completed. Juana Mariana Vazquez is the active working patient in the EMR.
Post-Condition
The Immunization Registry responds with Evaluated Vaccine History and Forecast for Juana Mariana Vazquez.
Test Objectives
Request/Receipt of Patient Immunization History: The system sends a request to the public health immunization registry "on demand," or in advance for those with scheduled appointments. The request includes the identifying information the immunization registry needs to match each patient with those in the registry including, if present, the mother's maiden name, a multiple birth indicator, and the birth order. The request also is sent in a pre-determined format the registry can read and interpret (Request Evaluated Immunization History and Forecast (Z44) - HL7 version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5).
Support for: Receive Dose Not Indicated Alert for Single Vaccine Order: The EHR or other clinical software system notifies the provider in instances when there are single or combination vaccine orders that are inconsistent with the expected timing intervals included in the vaccine forecast. Inconsistencies include suggestion of different date(s) for ordering the vaccine(s) or indication the vaccine(s) is/are no longer required.
Evaluation Criteria
Tester shall verify that the vendor can produce a valid Z44 query in accordance with the test data correctly and without omission.
Tester shall verify that the data in the message corresponds to the data in the EMR and contains all test data attributes supplied.

2.1.3. View and Compare response to request for vaccination history for Juana Mariana Vazquez

Test Step Type: TA_RESPONDER

The EMR displays the Immunization History results (Z42) returned in response to the Z44 Query and compare to those in the EMR.

Test Story

Description

The Immunization Registry returns an Evaluated History and Forecast (Z42) to the EMR in response to the query for patient (Juana Mariana Vazquez). The provider reviews the immunization history from the registry and compares to the immunization history in the EMR. The provider reviews the information from these sources, identifying information known only to the registry, and identifying information that is more accurately reflected in the local EMR:

The physician accesses the record for Juana Mariana Vazquez and the EHR Differentiates:

The following vaccinations are available only to the EMR:

diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 11/20/2018
poliovirus vaccine, inactivated (CVX 10) administered 2/21/2016, -- Adverse Reaction: febrile seizure (e.g. Simple febrile seizure (finding) 432354000) VXC11^convulsions (fits, seizures) within 72 hours of dose^CDCPHINV)
Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 10/15/2018

The EHR differentiates the following vaccinations which differ between the EMR and the IIS:

For the hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 12/20/2014, that EMR displays different text for the IIS (which documents a Non-specific formulation) and EMR (which documents hepatitis B vaccine, pediatric or pediatric/adolescent dosage) for Vaccine administered
--

The EHR differentiates the following vaccinations that are available from both the IIS and the local EMR:

measles, mumps, rubella virus vaccine (CVX 03) administered 8/22/2015 (an invalid dose)

The EHR differentiates the following vaccinations are that are available from the IIS that are not known to the local EMR:

hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 11/01/2014
hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 05/20/2015
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 1/22/2015
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 3/23/2015
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 5/22/2015
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 2/21/2016
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 1/22/2015
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 3/23/2015
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 5/22/2015
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 11/21/2015
poliovirus vaccine, inactivated (CVX 10) administered 1/22/2015
poliovirus vaccine, inactivated (CVX 10) administered 3/23/2015 – Adverse Reaction: (VXC12^fever of >40.5C (105F) within 48 hours of dose^CDCPHINVS)
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 1/22/2015
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 3/23/2015
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 5/22/2015
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 1/11/2016
rotavirus, live, monovalent vaccine (CVX 119) administered 1/22/2015
rotavirus, live, monovalent vaccine (CVX 119) administered 3/23/2015
Influenza, seasonal, injectable (CVX 141) administered 9/25/2015
Influenza, seasonal, injectable (CVX 141) administered 10/29/2015
Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 10/2/2016
Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 11/4/2017
hepatitis A vaccine, pediatric/adolescent dosage, 2 dose schedule (CVX 83) administered 11/23/2015
hepatitis A vaccine, pediatric/adolescent dosage, 2 dose schedule (CVX 83) administered 5/23/2016
measles, mumps, rubella virus vaccine (CVX 03) administered 9/22/2018
Varicella virus vaccine (CVX 21) administered 12/15/2016

Comments

No Comments

Pre-condition

Juana Mariana Vazquez Initial Data Load is completed.

Juana Mariana Vazquez is the active working patient in the EMR.

A Z44 query has been submitted to the Immunization Registry and a Z42 response is provided back to the EMR.

Post-Condition

Evaluated Immunization History returned from the registry is reviewed and compared to the immunizations in the patient record (Juana Mariana Vazquez).

Test Objectives

Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 Version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry.

Compare Public Health Immunization Registry (IIS) Immunization History to EHR Immunization History: The public health immunization registry has returned the requested immunization history for a patient (Return Evaluated Immunization History and Forecast (Z42) – HL7 Version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5). The EHR is able to display the evaluated immunization history received from the registry as well as the immunization history already present in the EHR so that a user can compare them. The EHR provides a way for the provider to view both histories, determine what is different (if anything), and update the existing EHR immunization history with new information from the public health registry if he or she chooses to do so. The system must store the new information as structured data as part of the patient's local immunization history and include the time of the update and the source of the new information.

Review Patient Immunization History: The EHR or other clinical software systems displays vaccine history by vaccine series.

Support for:

Receive Dose Not Indicated Alert for Single Vaccine Order: The EHR or other clinical software system notifies the provider in instances when there are single or combination vaccine orders that are inconsistent with the expected timing intervals included in the vaccine forecast. Inconsistencies include suggestion of different date(s) for ordering the vaccine(s) or indication the vaccine(s) is/are no longer required.

Evaluation Criteria

1. The EMR is able to receive the response from the Immunization Registry.
2. The EMR displays the information returned from the Immunization Registry according to the Juror Document.
 - Complete review for Polio administered 3/23/2015, MMR 8/22/2015.
 - remaining vaccines may be reviewed only for the vaccine name and date administered.
3. The EMR is able to differentiate the vaccines in the comparison between the EHR and the vaccination history.

Notes

The juror document also contains the verification content for the immunization forecast, which is tested and graded separately at step 5: View the vaccination history for Juana Mariana Vazquez. The criteria for this step is tested separately here and graded only with respect to the vaccine history.

Visualization of the adverse reaction for the Polio Vaccine in the history returned from the IIS is an advanced function. The adverse event is returned in the message and may be displayed during comparison by the EMR, but it is not listed in the Juror document.

The EMR must minimally display the vaccine administered and the date of the immunization.

DISPLAY VERIFICATION

This Test Case-specific Juror Document provides a checklist for the Tester to use during certification testing for assessing the EHR technology's ability to display required core data elements from the information received in the Evaluated Immunization History and Immunization Forecast Z42 response message. Additional data from the message or from the EHR are permitted to be displayed by the EHR. Grayed-out fields in the Juror Document indicate where no data for the data element indicated were included in the Z42 message for the given Test Case.

The format of this Juror Document is for ease-of-use by the Tester and does not indicate how the EHR display must be designed.

The Evaluated Immunization History and Immunization Forecast data shown in this Juror Document are derived from the Z42 message provided with the given Test Case; equivalent data are permitted to be displayed by the EHR. The column headings are meant to convey the kind of data to be displayed; equivalent labels/column headings are permitted to be displayed by the EHR.

Patient Information		
Element Name	Data	Tester Comment
Patient Identifier		
ID Number	123456	
Assigning Authority		
Namespace ID	MYEHR	
ID Type	MR	
Patient Identifier		
ID Number	987633	
Assigning Authority		
Namespace ID	MYIIS	
ID Type	SR	
Name	Juana Mariana Vazquez	
Date of Birth	11/01/2014	
Sex	Female	
Address 1		
Street	4345 Standish Way	
Other Designation		
City	Stamford	
State	CT	
Zip Code	06903	
Country	USA	
Address Type	L	
Mother's Maiden Name	Maria Merida Acosta	

When displayed in the EHR with the Evaluated Immunization History and Immunization Forecast, these patient demographics data may be derived from either the received immunization message or the EHR patient record. When displaying demographics from the patient record, the EHR must be able to demonstrate a linkage between the demographics in the message (primarily the patient ID in PID-3.1) and the patient record used for display to ensure that the message was associated with the appropriate patient.

Evaluated Immunization History Information		
Element Name	Data	Tester Comment
Entering Organization	Shoreline Hospital	
Vaccine Group	hepatitis B vaccine, unspecified formulation	
Vaccine Administered	hepatitis B vaccine, pediatric or pediatric/adolescent dosage	
Refusal Reason		
Date/Time Administration-Start	11/01/2014	
Date/Time Administration-End	11/01/2014	
Administered Amount	0.5	
Administered Units of Measure	mL	
Route of Administration	Intramuscular	
Administration Site	Left Thigh	
Substance Manufacturer Name	GlaxoSmithKline Biologicals SA	
Administration Notes	new immunization record	
Administering Provider		
Name	Jane Carter	
ID Number		
Administered-at Location

2.1.4. Mark first MMR Dose as Invalid

Test Step Type: SUT_MANUAL

Identify the first MMR dose which is given too early, as invalid. If the EHR does not already flagged the first MMR as invalid, the provider updates the first MMR to indicate it is invalid as it was given too early (as notified by the registry).

Test Story

Description

If the EHR does not already flag the first MMR as invalid, the provider updates the first MMR to indicate it is "invalid" as it was given too early (as notified by the registry).

Comments

If the EMR already recognizes the dose as invalid, then this step may be skipped.

Pre-condition

Initial Data Load - Step 2: Enter Initial Immunization Data for Juana Mariana Vazquez: Immunizations from practice.

Post-Condition

MMR status for the first MMR dose is set to invalid.

Test Objectives

dose validity is an important aspect of:

View Reconciled Immunization Forecast: The EHR or other clinical software system has the ability to re-evaluate and update the immunization forecast using a patient's newly updated immunization history, where the updated forecast results from the reconciliation of immunization data contained in the public health immunization registry with immunization data contained in the EHR. Processing the new forecast can be internal to the EHR or it can use an external forecasting service.

Evaluation Criteria

Evaluation Criteria: The vendor is able to record that the first MMR vaccination dose is invalid with a reason that it was given too early, and therefore the dose administered on 11/22/2018 should indicated dose '1'.

Notes

In the steps that follow, the MMR returned from the registry will be imported and the vaccine forecasting steps will further verify the correct documentation of the dose that will be imported from the registry as dose '1'.

2.1.5. View the vaccination forecast for Juana Mariana Vazquez

Test Step Type: TA RESPONDER

Vendor can successfully display the current Immunization Forecast (vaccination names and recommended vaccination dates) as returned by the Registry (Z42).

Test Story

Description The physician accesses the record for Juana Mariana Vazquez and: <ul style="list-style-type: none">- Displays the registry forecast as returned by the immunization registry.
Comments No Comments
Pre-condition A Z44 query has been submitted to the Immunization Registry and a Z42 response is provided back to the EMR.
Post-Condition Immunization Forecast returned from the registry has been displayed to the user.
Test Objectives View Immunization Forecast: The system provides a view of the immunization forecast provided by the IIS. The display includes the recommended vaccines and their associated dates (e.g., earliest, recommended, past due, latest) for each vaccine included in the forecast.
Evaluation Criteria <ol style="list-style-type: none">1. The EMR displays the information returned from the Immunization Registry according to the Juror Document.2. Verify that all forecast vaccines and dates returned by the registry are displayed to the user.
Notes <p>The verification content for the vaccine forecast also is part of the juror document in the prior step 3: View and Compare response to request for vaccination history for Juana Mariana Vazquez. The criteria for this step is tested separately here and graded only with respect to the vaccine forecast. Date when Vaccine Overdue may be omitted for the Influenza Vaccine.</p> <p>For MMR, the 2nd dose is due 10/31/18 according to the schedule. Since the first one was given too early, the child is behind. Verify that the EMR shows all 3 dates returned by the registry:</p> <ul style="list-style-type: none">- Earliest Date to Give- Vaccine Due Date- Date When Vaccine Overdue

DISPLAY VERIFICATION

This Test Case-specific Juror Document provides a checklist for the Tester to use during certification testing for assessing the EHR technology's ability to display required core data elements from the information received in the Evaluated Immunization History and Immunization Forecast Z42 response message. Additional data from the message or from the EHR are permitted to be displayed by the EHR. Grayed-out fields in the Juror Document indicate where no data for the data element indicated were included in the Z42 message for the given Test Case.

The format of this Juror Document is for ease-of-use by the Tester and does not indicate how the EHR display must be designed.

The Evaluated Immunization History and Immunization Forecast data shown in this Juror Document are derived from the Z42 message provided with the given Test Case; equivalent data are permitted to be displayed by the EHR. The column headings are meant to convey the kind of data to be displayed; equivalent labels/column headings are permitted to be displayed by the EHR.

Patient Information		
Element Name	Data	Tester Comment
Patient Identifier		
ID Number	123456	
Assigning Authority		
Namespace ID	MYEHR	
ID Type	MR	
Patient Identifier		
ID Number	987633	
Assigning Authority		
Namespace ID	MYIIS	
ID Type	SR	
Name	Juana Mariana Vazquez	
Date of Birth	11/01/2014	
Sex	Female	
Address 1		
Street	4345 Standish Way	
Other Designation		
City	Stamford	
State	CT	
Zip Code	06903	
Country	USA	
Address Type	L	
Mother's Maiden Name	Maria Merida Acosta	

When displayed in the EHR with the Evaluated Immunization History and Immunization Forecast, these patient demographics data may be derived from either the received immunization message or the EHR patient record. When displaying demographics from the patient record, the EHR must be able to demonstrate a linkage between the demographics in the message (primarily the patient ID in PID-3.1) and the patient record used for display to ensure that the message was associated with the appropriate patient.

Evaluated Immunization History Information		
Element Name	Data	Tester Comment
Entering Organization	Shoreline Hospital	
Vaccine Group	hepatitis B vaccine, unspecified formulation	
Vaccine Administered	hepatitis B vaccine, pediatric or pediatric/adolescent dosage	
Refusal Reason		
Date/Time Administration-Start	11/01/2014	
Date/Time Administration-End	11/01/2014	
Administered Amount	0.5	
Administered Units of Measure	mL	
Route of Administration	Intramuscular	
Administration Site	Left Thigh

2.1.6. Reconcile and import vaccinations from Evaluated History and Forecast for Juana Mariana Vazquez

Test Step Type: SUT_MANUAL

The Provider uses the EMR to compare the immunization history results (Z42) returned by the Immunization Registry in response to the Z44 Query with the immunization history in the local system and reconcile (import/update) records.

Test Story

Description Juana Mariana Vazquez immunization registry provided Evaluated History and Forecast is reconciled with the Immunization history information in the EMR.
Comments No Comments
Pre-condition A Z44 query has been submitted to the Immunization Registry and a Z42 response is provided back to the EMR, and the response is available in the EMR for reconciliation and import.
Post-Condition Evaluated Immunization History returned from the registry is reconciled and imported into the patient record (Juana Mariana Vazquez).
Test Objectives Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry. Compare Public Health Immunization Registry (IIS) Immunization History to EHR Immunization History: The public health immunization registry has returned the requested immunization history for a patient. The EHR is able to display the immunization history received from the registry as well as the immunization history already present in the EHR so that a user can compare them. The EHR provides a way for the provider to view both histories, determine what is different (if anything), and update the existing EHR immunization history with new information from the public health registry if he or she chooses to do so. The system must store the new information as structured data as part of the patient's local immunization history and include the time of the update and the source of the new information. Review Patient Immunization History: The EHR or other clinical software systems displays vaccine history by vaccine series. Support for: Receive Dose Not Indicated Alert for Single Vaccine Order: The EHR or other clinical software system notifies the provider in instances when there are single or combination vaccine orders that are inconsistent with the expected timing intervals included in the vaccine forecast. Inconsistencies include suggestion of different date(s) for ordering the vaccine(s) or indication the vaccine(s) is/are no longer required.
Evaluation Criteria

1. The user imports the vaccination, date administered, and documents adverse reactions reconciled from the returned vaccinations as follows:

a. Vaccinations NOT imported:

hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 12/20/2014
measles, mumps, and rubella virus vaccine (CVX 03) administered 8/22/2015
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 11/20/2018 [known only to EMR, not available from IIS]
poliovirus vaccine, inactivated (CVX 10) administered 2/21/2016 [known only to EMR, not available from IIS], VXC12^fever of >40.5C (105F) within 48 hours of dose^CDCPHINVS
Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 140) administered 10/15/2018 [known only to EMR, not available from IIS]

b. Vaccinations Imported:

hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 11/01/2014
hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 05/20/2015
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 1/22/2015
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 3/23/2015
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 5/22/2015
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 2/21/2016
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 1/22/2015
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 3/23/2015
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 5/22/2015
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 11/21/2015
poliovirus vaccine, inactivated (CVX 10) administered 1/22/2015
poliovirus vaccine, inactivated (CVX 10) administered 3/23/2015, adverse reaction: 31044-1^Reaction^LN 1 VXC11^convulsions (fits, seizures) within 72 hours of dose^CDCPHINVS
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 1/22/2015
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 3/23/2015
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 5/22/2015
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 1/11/2016
rotavirus, live, monovalent vaccine (CVX 119) administered 1/22/2015
rotavirus, live, monovalent vaccine (CVX 119) administered 3/23/2015
Influenza, seasonal, injectable (CVX 141) administered 9/25/2015
Influenza, seasonal, injectable (CVX 141) administered 10/29/2015
Influenza, injectable,quadrivalent, preservative free, pediatric (CVX 161) administered 10/2/2016
Influenza, injectable,quadrivalent, preservative free, pediatric (CVX 161) administered 11/4/2017
hepatitis A vaccine, pediatric/adolescent dosage, 2 dose schedule (CVX 83) administered 11/23/2015
hepatitis A vaccine, pediatric/adolescent dosage, 2 dose schedule (CVX 83) administered 5/23/2016
measles, mumps, rubella virus vaccine (CVX 03) administered 11/22/2018
Varicella virus vaccine (CVX 21) administered 12/15/2016

2. The tester verifies that the Reconciled Patient Immunization History can be displayed to the user.

Notes

No Note

2.1.7. View the updated vaccination forecast for Juana Mariana Vazquez

Test Step Type: SUT_MANUAL

Using the reconciled vaccine history information, the EMR displays the current Immunization Forecast to the user for Juana Mariana Vazquez.

Test Story

Description

Once the vaccine history is reconciled in the EMR, the vaccine forecast is updated.

Comments

No Comments

Pre-condition

EMR Vaccine History is Reconciled with Immunization History from the IIS (previous step 'Reconcile and import vaccinations from Evaluated History and Forecast returned by the Registry for Juana Mariana Vazquez').

Post-Condition

An updated vaccine forecast based upon the reconciled vaccine history is available to the user.

Test Objectives

View Reconciled Immunization Forecast: The EHR or other clinical software system has the ability to re-evaluate and update the immunization forecast using a patient's newly updated immunization history. Forecasts are updated following reconciliation of immunization data contained in the public health immunization registry with immunization data contained in the EHR. Processing the new forecast can be internal to the EHR or it can use an external forecasting service, but should reference the most recent recommendations.

Evaluation Criteria

Tester verifies that the vendor can display the immunization forecast based upon the reconciled vaccination history.

1. Verify that the EMR does not include in reconciled vaccine forecast:

IPV	due on 4/29/2015
-----	------------------

2. Verify that the EMR includes in reconciled vaccine forecast:

IPV	due on 10/31/2018
Varicella	due on 10/31/2018
influenza, unspecified formulation	due on 09/01/2019 or later (annual recommendation - specific date may vary somewhat)

Notes

The due date must be in range for the date shown. Vaccine forecast dates may be plus or minus 10 days to accommodate differences in date handling.

Since Influenza is seasonal, forecasting of Influenza may vary by test date. Once the Flu season is past, the next Flu vaccine forecast will be for the next season. The forecasting for children who are playing immunization catch-up may differ from the standard immunization forecast. Tester should document incidences where influenza is not forecasted and verify that the rationale for the omission is due to the date of the test. Variations relating to IPV refusals and catch-up should also be documented by the tester. Overdue date may be omitted for influenza.

Further variation should be documented in the notable exceptions, but minimally each forecast vaccine must be present.

2.2. Juana Mariana Vazquez, Enter Orders and Immunizations

The provider selects to order IPV and views information about the prior febrile seizure post-IPV vaccine.

Test Story

Description

This test will consist of ordering vaccines for the test patients, reviewing any alerts caused by specific scenarios, and documenting vaccinations administered to the patients.

Comments

No Comments

Pre-condition

Juana Mariana Vazquez is entered as a patient in the EMR with complete Demographic data, Immunization History Data, and Clinical Data according to the steps in the 'Juana Mariana Vazquez Initial Data Load.'

Post-Condition

Visit orders are entered in Juana Mariana Vazquez's record.

Test Objectives

Notify of Previous Adverse Event: EHRs and other clinical software systems alert providers to previous adverse events for a specific patient, in order to inform clinical decision-making when providers view an existing immunization record.

Record Vaccine Administration Deferral: The EHR or other clinical software system allows a user to enter a reason or reasons why a specific immunization was not given to a patient (e.g., due to contraindication, refusal, etc.). The system also stores that information in a structured way so it can be reported and analyzed as needed.

Receive Dose Not Indicated Alert for Single Vaccine Order: The EHR or other clinical software system notifies the provider in instances when there are single or combination vaccine orders that are inconsistent with the expected timing intervals included in the vaccine forecast. Inconsistencies include suggestion of different date(s) for ordering the vaccine(s) or indication the vaccine(s) is/are no longer required.

Record Vaccine Administration:

The EHR or other clinical software system records information about each vaccine administered. The EHR records this information as structured data elements, including, at a minimum: date administered, administering clinician, site of administration (e.g., left arm), immunization type, lot number, manufacturer, Vaccine Information Statement date, quantity of vaccine/dose size and ordering clinician. The system also assures data quality, i.e., data entered are appropriate (e.g., avoid “oral” route for IM vaccines, and assure dose is appropriate for the vaccine).

Enter Vaccination Order: The EHR or other clinical software system allows providers to order immunizations for a patient using filters for type of vaccine, including combination vaccines.

Record Past Immunizations: The EHR or other clinical software system allows providers to enter information about immunizations given elsewhere (e.g., by another doctor, at a public health clinic, pharmacy, etc.) with incomplete details.

Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry.

Data Quality: Sample of data quality checking for vaccine route.

Evaluation Criteria

Evaluation criteria is defined within each test step.

Notes

No Note

2.2.1. Order IPV and view prior reaction

Test Step Type: SUT_MANUAL

The provider selects to order IPV and views information about the prior febrile seizure post-IPV vaccine.

Test Story

Description

The physician accesses the record for Juana Mariana Vazquez and:

- Selects order for IPV and views information about the prior febrile seizure post-IPV vaccine.
- IPV is ordered for the patient.

Comments

In this step, the order is recorded after receiving the alert. This step is followed by parental refusal when the administration is attempted.

Pre-condition

Initial Data Load completed with demographic data, vaccination history, and clinical history. Historical Vaccination reconciled and loaded into the EMR.

Post-Condition

IPV order entered in patient record. User notified of history of adverse reaction to IPV (febrile seizures).

Test Objectives

Enter Vaccination Order: The EHR or other clinical software system allows providers to order immunizations for a patient using filters for type of vaccine, including combination vaccines.

Notify of Previous Adverse Event: EHRs and other clinical software systems alert providers to previous adverse events for a specific patient, in order to inform clinical decision-making when providers view an existing immunization record.

Evaluation Criteria

EMR Records the following order information and Alert. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

Entered BY	Sandra Molina
Ordering Provider	Frank Smith
Entering Organization	Shoreline Pediatrics
Vaccine Event information source	New immunization record (NIP001 00)
Value/Text for Vaccine Type	IPV (CVX 10)
Date/Time Vaccine Refusal was recorded	Current Date
Alert	Alerts user to information about the prior febrile seizure post-IPV vaccine

Notes

No Note

2.2.2. IPV Parental Refusal

Test Step Type: SUT_MANUAL

Documents mother's refusal for IPV vaccine indicating the parent decision, the reason and documents a deferral.

Test Story

Description

The mother is concerned about administering the IPV due to the prior adverse reaction and refuses to have the child immunized for IPV. The provider documents mother's refusal for IPV vaccine indicating the parent decision, the reason and documents a deferral at the time of attempted administration.

Comments

No Comments

Pre-condition

Prior Immunization History loaded and reconciled from the Immunization Registry. Order is entered for IPV. Provider has been alerted to prior adverse reaction to IPV of febrile seizures.

Post-Condition

Vaccine non-administration due to parental refusal is documented in the patient record. Deferral is recorded.

Test Objectives

Record Vaccine Administration Deferral: The EHR or other clinical software system allows a user to enter a reason or reasons why a specific immunization was not given to a patient (e.g., due to contraindication, refusal, etc.). The system also stores that information in a structured way so it can be reported and analyzed as needed.

Evaluation Criteria

EMR documents the non-administration of the IPV due to the parental refusal. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

Substance/Treatment Refusal Reason	Parental decision (NIP002 00)
Completion Status	RE
Date/Time Vaccine Deferral was recorded	Current Date
Deferral Reason	Parental decision (NIP002 00)
Deferral Status	Deferred

Notes

No Note

2.2.3. Enter Immunization Data for MMR Given 2 Weeks Prior

Test Step Type: SUT_MANUAL

Patient History from the parent for the latest MMR vaccine that was given 2 weeks prior to the current visit? is entered into the EMR. This is a pre-condition to the attempt to enter the varicella vaccine order.

Test Story

Description

The EHR vendor loads immunization history data for an MMR dose entered 2 weeks prior to the current visit date and an MMR dose that was given too early. These MMR doses serve to seed checking for the condition that it is too early to give a live vaccine in TestCaseGroup: Juana Mariana Vazquez Visit, TestCase: Juana Mariana Vazquez, Enter Orders and Immunizations, TestStep: Attempt to order Varicella Dose.

Comments

No Comments

Pre-condition

The EMR has recorded all of the pediatric demographic data in the record created for Juana Mariana Vazquez. All test steps that are part of the Query the Registry for Juana Mariana test steps are completed, including the vaccination forecasting.

Post-Condition

The immunization history of the MMR that was administered 2 weeks prior to the test date is loaded into the record created for Juana Mariana Vazquez.

Test Objectives

Record Past Immunizations: The EHR or other clinical software system allows providers to enter information about immunizations given elsewhere (e.g., by another doctor, at a public health clinic, pharmacy, etc.) with incomplete details.

Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry.

Supporting data for:

Receive Dose Not Indicated Alert for Single Vaccine Order: The EHR or other clinical software system notifies the provider in instances when there are single or combination vaccine orders that are inconsistent with the expected timing intervals included in the vaccine forecast. Inconsistencies include suggestion of different date(s) for ordering the vaccine(s) or indication the vaccine(s) is/are no longer required.

Evaluation Criteria

Evaluation Criteria: Vendor successfully records all immunization data known to the local practice as provided, with all required attributes indicated by [Y]. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

Vaccine from Practice MMR II		
Entered BY	Sandra Molina	Y
Ordering Provider	Frank Smith	Y
Entering Organization	Shoreline Pediatrics	Y
Administration Notes (Vaccine Event information source)	Historical information - from parent's written record (NIP001 03)	Y
Date/Time of Start of Administration	14 days prior to the Current Date	Y
Vaccine Administered	measles, mumps and rubella virus vaccine (CVX 03, NDC 00006-4681-01 - MMR II)	Y
Administered Amount (of Vaccine)	0.5	Y
Administered Units (of Measure)	mL	Y
Administering Provider	Sandra Molina	Y
Administered-at Location	400 Shoreline Drive, Stamford Connecticut 06901	Y
Lot Number	0934GG	Y
Substance Expiration Date	12/31/2020	Y
Substance Manufacturer.	Merck Sharp & Dohme Corp (MVX MSD)	Y
Completion Status	Completed (CP)	Y
Route of Administration	Subcutaneous (NCIT C28399, HL70162: SC)	Y
Administration Site	Left Deltoid (HL70163 LD)	Y

Notes

The MMR doses serve to seed checking for the condition that it is too early to give a live vaccine in TestCaseGroup: Juana Mariana Vazquez Visit, TestCase: Juana Mariana Vazquez, Enter Orders and Immunizations, TestStep: Attempt to order Varicella Dose.

2.2.4. Attempt to order Varicella Dose

Test Step Type: SUT_MANUAL

No Description

Test Story

Description

The provider attempts to give a Varicella dose and is warned that it is too soon to give a live vaccine dose.

Comments

No Comments

Pre-condition

Initial data load completed with demographic data, vaccination history, and clinical history. Historical Vaccination reconciled and loaded into the EMR. MMR dose entered at 14 days prior to the current date in TestCaseGroup: Juana Mariana Vazquez Visit, TestCase: Juana Mariana Vazquez, Enter Immunization Data for MMR Given 2 Weeks Prior.

Post-Condition

The provider has been issued a warning that it is too soon to give another live virus dose.

Test Objectives

Receive Dose Not Indicated Alert for Single Vaccine Order: The EHR or other clinical software system notifies the provider in instances when there are single or combination vaccine orders that are inconsistent with the expected timing intervals included in the vaccine forecast. Inconsistencies include suggestion of different date(s) for ordering the vaccine(s) or indication the vaccine(s) is/are no longer required.

Evaluation Criteria

There should be a warning that the attempt to give a new Varicella Dose is too early - should get warning that 28 days must pass between 2 live virus vaccines if not administered at the same time due to the prior MMR vaccination 14 days earlier.

Notes

If the checking that the dose is too early is handled in the forecast logic rather than the orders interface, this is acceptable to demonstrate the capability.

It can be expressed where it is not part of the recommended forecast and showing it is not 'due' or recommended until a later date.

2.2.5. Order Influenza Vaccine

Test Step Type: SUT_MANUAL

The provider selects to order Influenza vaccine.

Test Story

Description

The physician accesses the record for Juana Mariana Vazquez and:

- Selects order for Influenza vaccine.

Comments

This order is a pre-condition to the following two steps related to recording the Influenza vaccine.

Pre-condition

Initial Data Load completed with demographic data, vaccination history, and clinical history. Historical Vaccination reconciled and loaded into the EMR.

Post-Condition

Influenza order entered in patient record.

Test Objectives

Enter Vaccination Order: The EHR or other clinical software system allows providers to order immunizations for a patient using filters for type of vaccine, including combination vaccines.

Evaluation Criteria

EMR records the following order information. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

Entered BY	Sandra Molina
Ordering Provider	Frank Smith
Entering Organization	Shoreline Pediatrics
Vaccine Event information source	New immunization record (NIP001 00)
Value/Text for Vaccine Type	Influenza, seasonal, injectable, preservative free (CVX 161, NDC 49281-0519-00)
Date/Time Vaccine was recorded	Current Date

Notes

No Note

2.2.6. Records Influenza Vaccine administration route with data validation checking

Test Step Type: SUT_MANUAL

The provider records the vaccine administration in the EMR and is prevented from incorrectly documenting vaccine route.

Test Story

Description The nurse documents administration route for the IM inactivated influenza vaccine as 'intranasal': - Is prevented from documenting "intranasal" for intramuscular inactivated influenza vaccine.
Comments This step covers data quality checking as an informative aspect of vaccine administration.
Pre-condition Order is placed for intramuscular inactivated influenza vaccine.
Post-Condition The intramuscular, inactivated influenza vaccination route has failed to be recorded as intranasal in the EMR.
Test Objectives Record Vaccine Administration: The EHR or other clinical software system records information about each vaccine administered. The EHR records this information as structured data elements, including, at a minimum: date administered, administering clinician, site of administration (e.g., left arm), immunization type, lot number, manufacturer, Vaccine Information Statement date, quantity of vaccine/dose size and ordering clinician. The system also assures data quality, i.e., data entered are appropriate (e.g., avoid "oral" route for IM vaccines, and assure dose is appropriate for the vaccine). Data Quality: Sample of data quality checking for vaccine route.
Evaluation Criteria The EMR prevents the user from entering 'Intranasal' as a route for the intramuscular, inactivated influenza vaccine.
Notes While this test step requires verification of an appropriate route, the SUT should be sure that alternate route documentation is not restricted. While not part of this use case, there are situations where an alternate site may be medically indicated.

2.2.7. Record Influenza Vaccine administration

Test Step Type: SUT_MANUAL

The provider documents in the EMR all attributes associated with the new vaccine administration.

Test Story

Description

The nurse administers the inactivated influenza vaccine:

- Documents all required information for the vaccine.

Comments

No Comments

Pre-condition

Order is placed for inactivated influenza vaccine.

Post-Condition

The inactivated influenza vaccinations is recorded in the EMR.

Test Objectives

Record Vaccine Administration: The EHR or other clinical software system records information about each vaccine administered. The EHR records this information as structured data elements, including, at a minimum: date administered, administering clinician, site of administration (e.g., left arm), immunization type, lot number, manufacturer, Vaccine Information Statement date, quantity of vaccine/dose size and ordering clinician. The system also assures data quality, i.e., data entered are appropriate (e.g., avoid “oral” route for IM vaccines, and assure dose is appropriate for the vaccine).

Evaluation Criteria

The tester Verifies that there is a choice for VFC stock as she is VFC Eligible. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

EMR Records the following vaccine administration information:

Entered BY	Sandra Molina
Ordering Provider	Frank Smith
Entering Organization	Shoreline Pediatrics
Vaccine Event information source (Administration Notes)	New immunization record (NIP001 00)
Value/Text for Vaccine Type	Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161, NDC 49281-0519-00)
Vaccine 2-D Data Matrix	
Date/Time of Start of Administration	Current Date
Administered Amount (of Vaccine)	0.25
Administered Units (of Measure)	mL
Administering Provider	Sandra Molina
Administered-at Location	400 Shoreline Drive, Stamford Connecticut 06901
Lot Number	8L4B3521
Substance Expiration Date	12/31/2020
Substance Manufacturer Name	Sanofi Pasteur Inc (PMC)
Completion Status	Completed (CP)
Route of Administration	Intramuscular (NCIT C28161, HL70162 IM)
Administration Site	Left Deltoid (HL70163 LD)
VFC Eligibility	Yes
Funding Source	Public

Notes

The EMR does not need to specify a 'new immunization', as long as there is a way to indicate that it is a new immunization within the EMR, this is acceptable (e.g. the default interpretation of the data entry is that it is a new immunization and not historical).

2.3. Juana Mariana Vazquez Transmit Immunization Report

Send the Immunization Report to the Immunization Registry (VXU/Z22) for Juana Mariana Vazquez.

Test Story

Description

Following the vaccinations given during the visit, the EMR transmits an Immunization report to the Immunization Registry using the VXU/Z22. The Vaccination report includes all newly administered vaccines. The report should include vaccines incorrectly recorded in the IIS. The report MAY send the immunizations that the EMR imported from the IIS.

Comments

The Report must include all newly administered vaccines in any order. The report should also include the corrected information where the EMR has different information than the IIS and may also include the information imported from the IIS.

Pre-condition

The vaccines for the visit have been administered.

Post-Condition

The IIS has received the vaccine information (Z22 message).

Test Objectives

Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.

Identify Adverse Event: The EHR or other clinical software system enables capture of structured data regarding adverse events.

Notify Public Health Immunization Registry (IIS) of Update from Adverse Event: The EHR or other clinical software system notifies the public health immunization registry (IIS) of an update due to an adverse event.

Link Standard Codes to Immunization Data: The EHR or other clinical software system links standard codes (i.e., LOINC for lab tests or evaluation tools, SNOMED CT for conditions or observations, NDC codes for current immunizations, CVX for historical immunizations, appropriate codes for administration site, route, method, etc.) to discrete data elements associated with an immunization.

Note: Testing for NDC codes, CVX for immunizations.

Evaluation Criteria

Evaluation criteria is defined within each test step.

Notes

Sending information updated in the EMR back to the registry is an advanced function and some registries will not accept updates.

2.3.1. Transmit the immunization report to the Immunization Registry

Test Step Type: SUT_INITIATOR

The EMR send the Immunization Report to the Immunization Registry (VXU/Z22) for updated vaccination information from the visit. This includes all newly administered vaccines and may include historical information updated in the EMR during the visit.

Test Story

Description

Following the vaccinations given during the visit, the EMR transmits an Immunization report to the Immunization Registry using the VXU/Z22. The Vaccination report includes all newly administered vaccines. The report should include vaccines incorrectly recorded in the IIS. The report MAY send the immunizations that the EMR imported from the IIS.

Comments

The Report must include all newly administered vaccines in any order. the report should also include the corrected information where the EMR has different information than the IIS and may also include the information imported from the IIS.

Pre-condition

The vaccines for the visit have been administered.

Post-Condition

The Immunization Report has been transmitted to the IIS using a valid Z22 VXU in accordance with the test data correctly and without omission.

Test Objectives

Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.

Link Standard Codes to Immunization Data: The EHR or other clinical software system links standard codes (i.e., LOINC for lab tests or evaluation tools, SNOMED CT for conditions or observations, NDC codes for current immunizations, CVX for historical immunizations, appropriate codes for administration site, route, method, etc.) to discrete data elements associated with an immunization.

Note: Testing for NDC codes, CVX for immunizations.

Evaluation Criteria

The VXU/Z22 message passes validation using the NIST Immunization VXU Validation Tool (Z22) (context-free). The content of the message correctly reflects the test data (context-based) in accordance with the Test Data Specification and the Message Content.

Notes

Sending information updated in the EMR back to the registry is an advanced function and some registries will not accept updates.

The test data anticipates that the entire vaccine history is included in the message transmitted to the registry. Due to variation in practice, it is acceptable for the message to include only new vaccinations or only new vaccinations with updated content. The tester should document such instances, and may augment the submitted test message with such missing 'history' in order to run the test without error.

All NDC coded values are required to use the 11-Character format that includes dashes ('-').

Administered Vaccine	varicella virus vaccine
Date/Time Start of Administration	12/15/2016
Administered Amount	0.5
Administered Units	
Administration Notes	Historical information - from public agency
Administering Provider	J Martinez
Substance Lot Number	2341BB
Substance Expiration Date	12/01/2017
Substance Manufacturer Name	Merck Sharp and Dohme Corp
Substance/Treatment Refusal Reason	
Completion Status	Complete
Action Code	Add
Route	Subcutaneous
Administration Site	Right Deltoid
Entering Organization	Oceanview Pediatrics
Entered By	J Martinez
Ordered By	Carlos Herrera

2.3.2. Receive ACK Z23 from Immunization Registry

Test Step Type: TA_RESPONDER

The Immunization Registry returns a positive acknowledgement message indicating that no errors were found during the course of filing the message.

Test Story

Description
The Immunization Registry returns a positive acknowledgement message indicating that no errors were found during the course of filing the message.
Comments
No Comments
Pre-condition
A VXU message is generated by the EHR.
Post-Condition
The ACK Z23 is received by the EHR.
Test Objectives
Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.
Evaluation Criteria
The acknowledgement message is consumed by the system responsible for the content of the administration message without error. This is not typically part of the user interface, so this may be demonstrated through back-end evidence.
Notes
Important note regarding the MSH-10 and MSA-2: The NIST acknowledgment message is predefined and is based on the VXU message. Most systems will automatically create the message control Identifier and may require it for importing, linking, and processing the ACK message. The NIST ACK test message can be modified such that MSA-2 matches MSH-10 of the VXU message generated by the system-under test.

Test Data Specification

Patient Information

Element	Data
This information will be automatically supplied by the System	

2.3.3. Record an adverse reaction

Test Step Type: SUT_MANUAL

The Provider records in the EMR an adverse reaction of rash within 14 days of dose.

Test Story

Description
Following the vaccine administration, the mother reports that the patient had a rash within 14 days of dose.
Comments
No Comments
Pre-condition
The vaccinations for the visit have been administered.
Post-Condition
The adverse reaction to the Influenza vaccination of rash within 14 days of dose is recorded in the EMR.
Test Objectives
Identify Adverse Event: The EHR or other clinical software system enables capture of structured data regarding adverse events. Support for: Notify Public Health Immunization Registry (IIS) of Update from Adverse Event: The EHR or other clinical software system notifies the public health immunization registry (IIS) of an update due to an adverse event.
Evaluation Criteria
Verify that vendor can record the adverse reaction to the Influenza vaccination of rash within 14 days of dose correctly and without omission (VXC14). The coded value is not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions. If the vendor is unable to record the concept (VXC14) using the CDCPHINVS coding system to convey this reaction to the registry, the vendor may specify the reaction using SNOMED-CT or Narrative Text. This should be recorded as passing, but with a notable exception documented.
Notes
Adverse Reactions may be documented with SNOMED-CT or as a narrative note. These two approaches may be considered passing with notable exception. The approach that is used instead of the value set PHVS_VaccinationReaction_IIS 2.16.840.1.114222.4.11.3289 should be documented in the tester notes. The test data anticipates that the entire vaccine history is included in the message transmitted to the registry. Due to variation in practice, it is acceptable for the message to include only the record with the adverse reaction. The tester should document such instances and may augment the submitted test message with such missing 'history' in order to run the test without error.

2.3.4. Transmit the updated vaccination report with adverse reaction to the registry

Test Step Type: SUT_INITIATOR

The EMR generates a Z22 Send Unsolicited Immunization Update Using a VXU correctly and without omission according to supplied test data.

Test Story

Description

The adverse reaction to the Influenza vaccination of rash within 14 days of dose is reported to the Immunization Registry using a Z22/VXU message.

Comments

No Comments

Pre-condition

An adverse reaction to the Influenza vaccination of rash within 14 days of dose is recorded in the EMR.

Post-Condition

The adverse reaction has been transmitted to the IIS.

Test Objectives

Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.

Identify Adverse Event: The EHR or other clinical software system enables capture of structured data regarding adverse events.

Notify Public Health Immunization Registry (IIS) of Update from Adverse Event: The EHR or other clinical software system notifies the public health immunization registry (IIS) of an update due to an adverse event.

Link Standard Codes to Immunization Data: The EHR or other clinical software system links standard codes (i.e., LOINC for lab tests or evaluation tools, SNOMED CT for conditions or observations, NDC codes for current immunizations, CVX for historical immunizations, appropriate codes for administration site, route, method, etc.) to discrete data elements associated with an immunization.

Note: Testing for NDC codes, CVX for immunizations.

Evaluation Criteria

The VXU/Z22 message passes validation using the NIST Immunization VXU Validation Tool (Z22) (context-free). The content of the message correctly reflects the test data (context-based) in accordance with the Test Data Specification and the Message Content.

The test data anticipates that the only the updated vaccine is included in the message transmitted to the registry. Due to variation in practice, it is acceptable for the message to include only vaccinations with updated content or a broader vaccination history. The tester should document instances where the updated message includes additional vaccine information.

Notes

The tester verifies that the message includes 'U' in RXA 21 for the Influenza vaccine.

The test data anticipates that the only the updated vaccine is included in the message transmitted to the registry. Due to variation in practice, it is acceptable for the message to include only vaccinations with updated content or a broader vaccination history. The tester should document instances where the updated message includes additional vaccine information.

All NDC coded values are required to use the 11-Character format that includes dashes ('-').

2.3.5. Receive ACK Z23 from Immunization Registry for Updated Transmission

Test Step Type: TA_RESPONDER

The Immunization Registry returns a positive acknowledgement message indicating that no errors were found during the course of filing the message.

Test Story

Description
The Immunization Registry returns a positive acknowledgement message indicating that no errors were found during the course of filing the message.
Comments
No Comments
Pre-condition
A VXU message is generated by the EHR.
Post-Condition
The ACK Z23 is received by the EHR.
Test Objectives
Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.
Evaluation Criteria
The acknowledgement message is consumed by the system responsible for the content of the administration message without error. This is not typically part of the user interface, so this may be demonstrated through back-end evidence.
Notes
Important note regarding the MSH-10 and MSA-2: The NIST acknowledgment message is predefined and is based on the VXU message. Most systems will automatically create the message control Identifier and may require it for importing, linking, and processing the ACK message. The NIST ACK test message can be modified such that MSA-2 matches MSH-10 of the VXU message generated by the system-under test.

Test Data Specification

Patient Information

Element	Data
This information will be automatically supplied by the System	

2.4. Juana Mariana Vazquez Display Immunization Report

Produce an immunization report for the patient including all history (the report can be provided in various formats - e.g., print, send to patient portal, etc.).

Test Story

Description

Following the vaccination visit, the provider uses the EMR to produce an immunization report for the patient including all history (the report can be provided in various formats - e.g., print, send to patient portal, etc.).

Comments

No Comments

Pre-condition

Initial Data Load completed with demographic data, vaccination history, and clinical history. Historical Vaccination reconciled and loaded into the EMR. New vaccinations have been administered.

Post-Condition

The patient/parent has been provided a patient immunization history report.

Test Objectives

Produce Standard Patient Immunization History Report: The EHR or other clinical software system produces a report of a patient's immunization history that is appropriate for various entities, such as schools and day-care centers.

Produce Immunization Forecast Report: The EHR or other clinical software system creates a list of immunizations to be administered within a specified time frame.

Evaluation Criteria

Evaluation criteria is defined within each test step.

Notes

No Note

2.4.1. Produce an immunization report for Juana Mariana Vazquez including all history

Test Step Type: SUT_MANUAL

The EMR is used to produce an immunization report for the patient including all history (the report can be provided in various formats - e.g., print, send to patient portal, etc.).

Test Story

Description

Following the vaccination visit, the provider uses the EMR to produce an immunization report for the patient including all history (the report can be provided in various formats - e.g., print, send to patient portal, etc.).

Due Date:	10/31/2019
Earliest Date to Give:	10/31/2019
Overdue Date:	10/31/2020
Immunization Schedule:	ACIP
Vaccine Group:	varicella
Due Date:	10/31/2019
Earliest Date to Give:	10/31/2019
Overdue Date:	10/31/2020
Immunization Schedule:	ACIP

Notes

The immunization report may provide a subset of demographic information sufficient to identify the patient. Any demographic information included should be evaluated against the listed demographic information for accuracy.

The immunization report does not need to display all of the information listed in the evaluation criteria for each vaccination, but they do need to produce the complete list of vaccines given and the date.

The tester is requested to document separately the success or failure of the Immunization History and the Immunization forecast as these two requirements are tested concurrently.

Influenza vaccine should be due between September and October of the flu season, which may show as the prior year to testing or the year of testing.

2.5. Juana Mariana Vazquez Provide Patient Access to Immunization Report

Provide patient access to the immunization record for the patient including all history (the report can be provided in various formats - e.g., print, send to patient portal, etc.).

Test Story

Description
Following the vaccination visit, the provider uses the EMR to produce an immunization report that can be accessed by the patient including all history (the report can be provided in various formats - e.g., print, send to patient portal, etc.) and the vaccine forecast.
Comments
No Comments
Pre-condition
Initial Data Load completed with demographic data, vaccination history, and clinical history. Historical Vaccination reconciled and loaded into the EMR. New vaccinations have been administered.
Post-Condition
The patient/parent has been provided access to ta patient immunization history record.
Test Objectives
Produce Standard Patient Immunization History Report: The EHR or other clinical software system produces a report of a patient's immunization history that is appropriate for various entities, such as schools and day-care centers.
Provide Access to Recommendations and Vaccine Information Statement(s): The immunization record displays immunization recommendations to be discussed with a provider, displaying the relevant Vaccine Information Statement.
Evaluation Criteria
Evaluation criteria is defined within each test step.
Notes
No Note

2.5.1. Produce an immunization report for Juana Mariana Vazquez including all history

Test Step Type: SUT_MANUAL

The EMR is used to produce an immunization report for the patient including all history (the report can be provided in various formats - e.g., print, send to patient portal, etc.).

Test Story

Description

Following the vaccination visit, the patient/parent uses the specified interface to access the immunization report for the patient including all history (the report can be provided in various formats - e.g., print, send to patient portal, etc.).

Comments

No Comments

Pre-condition

Initial Data Load completed with demographic data, vaccination history, and clinical history. Historical Vaccination reconciled and loaded into the EMR. New vaccinations have been administered. The parent/patient is provided with an account to access the immunization history.

Post-Condition

The patient/parent has been provided a patient immunization history report.

Test Objectives

Provide Access to Patient Immunization Record: The EHR or other clinical software system provides patients and their authorized representatives with electronic access to immunization records (either directly or by interacting with an external system such as a patient portal).

Provide Access to Recommendations and Vaccine Information Statement(s): The immunization record displays immunization recommendations to be discussed with a provider, displaying the relevant Vaccine Information Statement.

Evaluation Criteria

Using the patient facing features (e.g. portal), show that the vaccine history can be displayed including today's vaccine/forecast:

The following patient demographics are displayed:

Patient Identifier Number:	Vendor Assigned
Patient Identifier Type Code:	Vendor Assigned
Patient Name:	Juana Mariana Vazquez
Date/Time of Birth:	11/01/2014 11:05am
Sex:	Female
Patient Address:	4345 Standish Way, Stamford, CT, 06903
Multiple Birth:	N
Birth Order:	NA

The following Vaccination History is displayed:

Notes

If the same immunization report verified in TestCase 4 for Juana Mariana Vazquez is used for the patient access to the immunization record, then content verification does not need to be repeated.

Influenza vaccine should be due between September and October of the flu season, which may show as the prior year to testing or the year of testing.

Also, since MMR was given 2 weeks prior, forecasting of immunizations due may be adjusted by the vendor forecast to account for the requirement there must be at least 28 days between immunizations using a live virus. Tester should document incidences where the forecast is adjusted or annotated as a result of this requirement.

3. Juan Marcel Marina Visit

Juan Marcel Marina visits the provider where his immunization history is retrieved from the registry and reconciled with the local information in the medical record to determine vaccines that are due. Vaccinations are ordered and administered. The vaccines are reported to the immunization registry and a vaccine summary is available for the patient.

Notes

3.1. Query the Registry for Juan Marcel Marina

EMR Generates a Z44 query to the Immunization Registry to retrieve the Evaluated History and Forecast for Juan Marcel Marina.

Test Story

Description

Querying the registry will consist of the vendor creating Z44 messages for Juan Marcel Marina to be sent to the registry. The response will be processed as part of the 'Display, Reconcile, Import and Update Immunization Information' activity.

Using the Z42 Response to Immunization Registry Query, the EMR displays the Evaluated History and Forecast to the user for reconciliation and update. The vendor will receive information back from the registry and show the ability to view and reconcile, and import the information returned by the registry (NOTE: the Z42 message will be provided either manually, or as part of the tool). This test will also look at the system's ability to view the forecast returned by the registry and create a new forecast after reconciling the information.

Comments

No Comments

Pre-condition

Juan Marcel Marina is entered as a patient in the EMR with complete Demographic data, Immunization History Data, and Clinical Data according to the steps in the 'Juan Marcel Marina Initial Data Load'.

Post-Condition

A Z44 Query is generated and submitted to the Immunization Registry/Test tool, and a Z42 response is returned.

Test Objectives

Select New Patient: The system must allow a user to distinguish information about patients with similar names or identifying information in order to select the right patient from the providers' EHR or other clinical software. This information is crucial for identifying and selecting the correct patient. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar sounding names. In order to match patients with those already in the immunization registry, the EHR or other clinical software should have the ability to record the mother's maiden name, whether the patient was part of a multiple birth, and if so, the order of birth (when such information is available). The provider should be aware of how often the protection indicator information must be updated based on local rules.

Request/Receipt of Patient Immunization History: The system sends a request to the public health immunization registry "on demand," or in advance for those with scheduled appointments. The request includes the identifying information the immunization registry needs to match each patient with those in the registry including, if present, the mother's maiden name, a multiple birth indicator, and the birth order. The request also is sent in a pre-determined format the registry can read and interpret (Request Evaluated Immunization History and Forecast (Z44) - HL7 version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5).

Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry.

View Reconciled Immunization Forecast: The EHR or other clinical software system has the ability to re-evaluate and update the immunization forecast using a patient's newly updated immunization history. Forecasts are updated following reconciliation of immunization data contained in the public health immunization registry with immunization data contained in the EHR. Processing the new forecast can be internal to the EHR or it can use an external forecasting service, but should reference the most recent recommendations.

Review Patient Immunization History: The EHR or other clinical software systems displays vaccine history by vaccine series.

Support for:

Receive Dose Not Indicated Alert for Single Vaccine Order: The EHR or other clinical software system notifies the provider in instances when there are single or combination vaccine orders that are inconsistent with the expected timing intervals included in the vaccine forecast. Inconsistencies include suggestion of different date(s) for ordering the vaccine(s) or indication the vaccine(s) is/are no longer required.

Evaluation Criteria

Evaluation criteria is defined within each test step.

Notes

No Note

3.1.1. Select Patient Juan Marcel Marina

Test Step Type: SUT_MANUAL

Select patient Juan Marcel Marina, distinguishing the patient from other patients with similar demographics (similar names).

Test Story

Description
Juan Marcel Marina is selected as the patient and his record is opened in the EMR.
Comments
No Comments
Pre-condition
Juan Marcel Marina Initial Data Load completed.
Post-Condition
Juan Marcel Marina is the active working patient in the EMR.
Test Objectives
Select New Patient: The system must allow a user to distinguish information about patients with similar names or identifying information in order to select the right patient from the providers' EHR or other clinical software. This information is crucial for identifying and selecting the correct patient. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar sounding names. In order to match patients with those already in the immunization registry, the EHR or other clinical software should have the ability to record the mother's maiden name, whether the patient was part of a multiple birth, and if so, the order of birth (when such information is available). The provider should be aware of how often the protection indicator information must be updated based on local rules.
Evaluation Criteria

Tester shall verify that the product can distinguish Juan Marcel Gonzales from similar sounding names using all of the pediatric demographics:

Patient ID (previously listed as "Medicaid Number")	Vendor supplied

3.1.2. Query Registry for vaccination history and forecast for Juan Marcel Marina

Test Step Type: SUT_INITIATOR

The EMR generates a Z44 query for immunization history and forecast correctly and without omission according to supplied test data.

Test Story

Description
The provider uses the EMR to query the Immunization Registry for an Evaluated History and Forecast based on information known to the Immunization Registry.
Comments
No Comments
Pre-condition
Juan Marcel Marina Initial Data Load is completed. Juan Marcel Marina is the active working patient in the EMR.
Post-Condition
The Immunization Registry responds with Evaluated Vaccine History and Forecast for Juan Marcel Marina.
Test Objectives
Request/Receipt of Patient Immunization History: The system sends a request to the public health immunization registry "on demand," or in advance for those with scheduled appointments. The request includes the identifying information the immunization registry needs to match each patient with those in the registry including, if present, the mother's maiden name, a multiple birth indicator, and the birth order. The request also is sent in a pre-determined format the registry can read and interpret (Request Evaluated Immunization History and Forecast (Z44) - HL7 version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5).
Evaluation Criteria
Tester shall verify that the vendor can produce a valid Z44 query in accordance with the test data correctly and without omission. Tester shall verify that the data in the message corresponds to the data in the EMR and contains all test data attributes supplied.

3.1.3. View and import response to request for vaccination history for Juan Marcel Marina

Test Step Type: TA_RESPONDER

The EMR displays the Immunization History results (Z42) returned in response to the Z44 Query and import them into the EMR.

Test Story

Description

The physician accesses the record for Juan Marcel Marina and:

- Accepts the vaccines provided by the registry as this is a new patient and there are no prior vaccines recorded.

Comments

There is no reconciliation step as there are no historical immunizations in the EMR. All will be imported from the Z42 response.

Pre-condition

A Z44 query has been submitted to the Immunization Registry and a Z42 response is provided back to the EMR and the response is available in the EMR for reconciliation and import.

Post-Condition

Evaluated Immunization History returned from the registry is reconciled and imported into the patient record (Juan Marcel Marina).

Test Objectives

Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry.

Compare Public Health Immunization Registry (IIS) Immunization History to EHR Immunization History: The public health immunization registry has returned the requested immunization history for a patient. The EHR is able to display the immunization history received from the registry as well as the immunization history already present in the EHR so that a user can compare them. The EHR provides a way for the provider to view both histories, determine what is different (if anything), and update the existing EHR immunization history with new information from the public health registry if he or she chooses to do so. The system must store the new information as structured data as part of the patient's local immunization history and include the time of the update and the source of the new information.

Review Patient Immunization History: The EHR or other clinical software systems displays vaccine history by vaccine series.

Supporting data for:

Receive Dose Not Indicated Alert for Single Vaccine Order: The EHR or other clinical software system notifies the provider in instances when there are single or combination vaccine orders that are inconsistent with the expected timing intervals included in the vaccine forecast. Inconsistencies include suggestion of different date(s) for ordering the vaccine(s) or indication the vaccine(s) is/are no longer required.

Evaluation Criteria

1. The EMR displays the information returned from the Immunization Registry according to the Juror Document.
2. The user imports returned vaccinations as follows using only the vaccination, and administration dates returned from the Immunization Registry:
 - a. Vaccinations Imported:

hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 3/4/2018
hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 4/15/2018
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 5/15/2018
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 7/13/2018
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 9/16/2018
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 8/20/2019
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 5/14/2018
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 7/21/2018
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 9/27/2018
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 5/4/2019
poliovirus vaccine, inactivated (CVX 10) administered 5/14/2018
poliovirus vaccine, inactivated (CVX 10) administered 7/21/2018
poliovirus vaccine, inactivated (CVX 10) administered 10/15/2018
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 5/18/2018
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 7/21/2018
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 9/27/2018
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 5/4/2019
rotavirus, live, monovalent vaccine (CVX 119) administered 5/18/2018
rotavirus, live, monovalent vaccine (CVX 119) administered 9/21/2018
Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 9/27/2018
Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 10/20/2018
measles, mumps, rubella virus vaccine (CVX 03) administered 6/20/2019

Notes

The EMR must minimally display the vaccine administered and the date of the immunization.

DISPLAY VERIFICATION

This Test Case-specific Juror Document provides a checklist for the Tester to use during certification testing for assessing the EHR technology's ability to display required core data elements from the information received in the Evaluated Immunization History and Immunization Forecast Z42 response message. Additional data from the message or from the EHR are permitted to be displayed by the EHR. Grayed-out fields in the Juror Document indicate where no data for the data element indicated were included in the Z42 message for the given Test Case.

The format of this Juror Document is for ease-of-use by the Tester and does not indicate how the EHR display must be designed.

The Evaluated Immunization History and Immunization Forecast data shown in this Juror Document are derived from the Z42 message provided with the given Test Case; equivalent data are permitted to be displayed by the EHR. The column headings are meant to convey the kind of data to be displayed; equivalent labels/column headings are permitted to be displayed by the EHR.

Patient Information		
Element Name	Data	Tester Comment
Patient Identifier		
ID Number	123456	
Assigning Authority		
Namespace ID	MYEHR	
ID Type	MR	
Patient Identifier		
ID Number	987633	
Assigning Authority		
Namespace ID	MYIIS	
ID Type	SR	
Name	Juan Marcel Marina	
Date of Birth	03/04/2018	
Sex	Male	
Address 1		
Street	4623 Standish Way	
Other Designation		
City	Stamford	
State	CT	
Zip Code	06903	
Country	USA	
Address Type	L	
Mother's Maiden Name	Anita Francesca Morales	

When displayed in the EHR with the Evaluated Immunization History and Immunization Forecast, these patient demographics data may be derived from either the received immunization message or the EHR patient record. When displaying demographics from the patient record, the EHR must be able to demonstrate a linkage between the demographics in the message (primarily the patient ID in PID-3.1) and the patient record used for display to ensure that the message was associated with the appropriate patient.

Evaluated Immunization History Information		
Element Name	Data	Tester Comment
Entering Organization	Shoreline Hospital	
Vaccine Group	hepatitis B vaccine, unspecified formulation	
Vaccine Administered	Hepatitis B	
Refusal Reason		
Date/Time Administration-Start	03/04/2018	
Date/Time Administration-End	03/04/2018	
Administered Amount	0.5	
Administered Units of Measure	mL	
Route of Administration	Intramuscular	
Administration Site	Left Thigh	
Substance Manufacturer Name	GlaxoSmithKline Biologicals SA	
Administration Notes		
Administering Provider		
Name	J. Martinez	
ID Number		
Administered-at Location

3.1.4. View the vaccination forecast for Juan Marcel Marina

Test Step Type: SUT_MANUAL

The EMR displays the current Immunization Forecast to the user for Juan Marcel Marina either as returned by the IIS in prior step, or as generated through any local means.

Test Story

Description

The physician accesses the record for Juan Marcel Marina and, once the vaccine history is reconciled in the EMR, the vaccine forecast is updated.

- The provider views the updated vaccine forecast (either as provided by the Immunization Registry or as determined through EMR defined methods).

Comments

The vaccine forecast may be imported from the Immunization Registry Vaccination History and Forecast (Z42) response, or it may be generated by EMR defined means.

Pre-condition

EMR Vaccine History is imported from the Immunization History returned from the Immunization Registry (previous step 'View and import response to request for vaccination history for Juan Marcel Gonzales').

Post-Condition

A vaccine forecast based upon the imported vaccine history is available to the user.

Test Objectives

View Reconciled Immunization Forecast: The EHR or other clinical software system has the ability to re-evaluate and update the immunization forecast using a patient's newly updated immunization history. Forecasts are updated following reconciliation of immunization data contained in the public health immunization registry with immunization data contained in the EHR. Processing the new forecast can be internal to the EHR or it can use an external forecasting service, but should reference the most recent recommendations.

Modify Antigen Recommendations Based on Active Diagnoses: The system notifies the provider of any conflicts between recommended vaccines in the updated forecast and the patient's current or historical diagnoses.

Evaluation Criteria

1. Tester verifies that the vendor can display the immunization forecast based upon the reconciled vaccination history:

2. Verify that the EMR includes in the vaccine forecast:

Hep B Peds NOS due on 8/31/2019

influenza, unspecified formulation due on Sep 1, 2019 or later (annual recommendation - specific date may vary somewhat)

In support of test objective 'Modify Antigen Recommendations Based on Active Diagnoses' the tester verifies that the system notifies the provider that:

Varicella due on 3/4/2019 - Forecast should not show that they need vaccine for Varicella; because of known diagnosis that this is due.

Hep A is due 3/4/2019 - Forecast may not show that they need the vaccine for Hepatitis A due to serologic immunity to the disease.

Notes

The due date must be in range for the date shown. Vaccine forecast dates may be plus or minus 10 days to accommodate differences in date handling.

Further variation should be documented in the notable exceptions, but minimally each forecast vaccine must be present.

While there is not an expected recommendation for the earliest date to give for influenza, this may appear in some EMR implementations. Tester should note if this is included.

Tester should document how evidence of prior disease (Varicella) is documented (e.g. if not in forecast, is there a reason available to clinician).

Manual override does not fulfill the 'modify antigen recommendations based on active diagnosis' (e.g. if the system does not support this through CDS then not fulfilled).

This criteria is considered 'Advanced', so tester should note support for this criteria separately.

3.2. Juan Marcel Marina, Enter Orders and Immunizations

Orders and Immunization events, non-administrations, and alerts presented for current visit.

Test Story

Description

This test will consist of ordering vaccines for the test patients, reviewing any alerts caused by specific scenarios, and documenting vaccinations administered to the patients.

No Comments

Pre-condition

Juan Marcel Marina is entered as a patient in the EMR with complete Demographic data, Immunization History Data, and Clinical Data according to the steps in the 'Juan Marcel Marina Initial Data Load.'

Post-Condition

Visit orders are entered in Juan Marcel Marina's record.

Test Objectives

Modify Antigen Recommendations Based on Active Diagnoses: The system notifies the provider of any conflicts between recommended vaccines in the updated forecast and the patient's current or historical diagnoses.

Enter Vaccination Order: The EHR or other clinical software system allows providers to order immunizations for a patient using filters for type of vaccine, including combination vaccines.

Receive Dose Not Indicated Alert for Single Vaccine Order: The EHR or other clinical software system notifies the provider in instances when there are single or combination vaccine orders that are inconsistent with the expected timing intervals included in the vaccine forecast. Inconsistencies include suggestion of different date(s) for ordering the vaccine(s) or indication the vaccine(s) is/are no longer required.

Notify of Vaccine Dose Expiration: The EHR or other clinical software system notifies the provider administering a vaccine if the dose chosen for administration is expired.

Record Vaccine Administration: The EHR or other clinical software system records information about each vaccine administered. The EHR records this information as structured data elements, including, at a minimum: date administered, administering clinician, site of administration (e.g., left arm), immunization type, lot number, manufacturer, Vaccine Information Statement date, quantity of vaccine/dose size and ordering clinician. The system also assures data quality, i.e., data entered are appropriate (e.g., avoid "oral" route for IM vaccines, and assure dose is appropriate for the vaccine).

Notify of Vaccine Dose Ineligibility: The EHR or other clinical software system provides a method for alerting a provider if a vaccine is selected for a patient who is not eligible for the inventory item selected.

Evaluation Criteria

Evaluation criteria is defined within each test step.

Notes

No Note

3.2.1. Orders administration of Hepatitis B vaccine

Test Step Type: SUT_MANUAL

The provider orders a Hepatitis B vaccine (dose 3).

Test Story

Description

As indicated by the vaccine forecast, the third Hepatitis B is overdue, and is ordered.

Comments

No Comments

Pre-condition

Initial Data Load completed with demographic data, vaccination history, and clinical history. Historical Vaccination reconciled and loaded into the EMR. Vaccine forecast reviewed.

Post-Condition

Hepatitis B vaccine is ordered for the patient.

Test Objectives

Enter Vaccination Order: The EHR or other clinical software system allows providers to order immunizations for a patient using filters for type of vaccine, including combination vaccines.

Evaluation Criteria

EMR Records the following order information: The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

Entered BY	Sandra Molina
Ordering Provider	Frank Smith
Entering Organization	Shoreline Pediatrics
Vaccine Event information source	New immunization record (NIP001 00)
Order Value/Text for Vaccine Type	hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08, NDC 58160-0820-43)
Vaccine 2-D Data Matrix	
Date/Time Vaccine was recorded	Current Date

Notes

No Note

3.2.2. Orders administration of DTaP vaccine and alerted that the dose is too early

Test Step Type: SUT_MANUAL

The provider orders a DTaP vaccine (dose 5). The EMR provides an alert that the vaccine dose is too early.

Test Story

Description														
The fifth DTaP is ordered, and the provider is notified that the dose is too early.														
Comments														
No Comments														
Pre-condition														
Initial Data Load completed with demographic data, vaccination history, and clinical history. Historical Vaccination reconciled and loaded into the EMR. Vaccine forecast is available in the EMR.														
Post-Condition														
DTaP vaccine is ordered for the patient, and provider is notified that the dose is too early.														
Test Objectives														
Receive Dose Not Indicated Alert for Single Vaccine Order: The EHR or other clinical software system notifies the provider in instances when there are single or combination vaccine orders that are inconsistent with the expected timing intervals included in the vaccine forecast. Inconsistencies include suggestion of different date(s) for ordering the vaccine(s) or indication the vaccine(s) is/are no longer required.														
Enter Vaccination Order: The EHR or other clinical software system allows providers to order immunizations for a patient using filters for type of vaccine, including combination vaccines.

3.2.3. Attempt to record HepB Vaccine administration route with data validation checking

Test Step Type: SUT_MANUAL

The provider records the vaccine administration route in the EMR and is prevented from incorrectly documenting vaccine route.

Test Story

Description

The nurse documents administration route for the HepB vaccine:

- Is prevented from documenting "oral" for HepB vaccine.

Comments

This step covers data quality checking as an informative aspect of vaccine administration.

Pre-condition

Order is placed for HepB vaccine.

Post-Condition

The HepB vaccination route has failed to be recorded as 'oral' in the EMR.

Test Objectives

Record Vaccine Administration:

The EHR or other clinical software system records information about each vaccine administered. The EHR records this information as structured data elements, including, at a minimum: date administered, administering clinician, site of administration (e.g., left arm), immunization type, lot number, manufacturer, Vaccine Information Statement date, quantity of vaccine/dose size and ordering clinician. The system also assures data quality, i.e., data entered are appropriate (e.g., avoid "oral" route for IM vaccines, and assure dose is appropriate for the vaccine).

Data Quality: Sample of data quality checking for vaccine route.

Evaluation Criteria

The EMR warns the user that 'Oral' as a route for the HepB vaccine is not correct.

Notes

Verification checking for invalid route or site should not prevent the user from selecting the alternate route or site. While this test case example is not one that would make sense to ignore the warning, there situations where an alternate site or route may be medically indicated. This test should not be interpreted to restrict the ability of the EMR to document such alternate routes or sites that may be intentionally selected by the clinician.

3.2.4. Records Hepatitis B Vaccine lot number with expired lot alert

Test Step Type: SUT_MANUAL

The provider records the vaccine administration lot number in the EMR and is alerted of the expired lot.

Test Story

Description

The nurse documents administration lot number for the Hepatitis B vaccine:

- Is prevented from ordering the Hepatitis B lot as it has expired.
- Documents administration from a different lot that is not expired.

Comments

No Comments

Pre-condition

Order is placed for Hepatitis B vaccine.

Post-Condition

The provider has been notified of the expired Hepatitis B vaccination lot. Documentation of a lot to be administered that is not expired is recorded in the EMR.

Test Objectives

Notify of Vaccine Dose Expiration: The EHR or other clinical software system notifies the provider administering a vaccine if the dose chosen for administration is expired.

Evaluation Criteria

EMR Records the following order information and Alert. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

Entered BY	Sandra Molina
Ordering Provider	Frank Smith
Entering Organization	Shoreline Pediatrics
Vaccine Event information source	New immunization record (NIP001 00)
Date/Time of Start of Administration	Current Date
Vaccine Administered	hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) ENGERIX-B (NDC 58160-0820-43)
Vaccine 2-D Data Matrix	
Lot Number (Expired)	6332FK18
Substance Expiration Date (Expired)	6/15/2019
Substance Manufacturer Name	GlaxoSmithKline Biologics SA (MVX SKB)
Alert	Alerts user to expired lot

Notes

No Note

3.2.5. Record Hepatitis B Vaccine administration

Test Step Type: SUT_MANUAL

The EMR is able to document all attributes associated with the new vaccine administration.

Test Story

Description

The nurse administers the Hepatitis B vaccine:

- Documents all required information for the vaccine.

Comments

No Comments

Pre-condition

Order is placed for Hepatitis B vaccine.

Post-Condition

The Hepatitis B vaccination is recorded in the EMR.

Test Objectives

Record Vaccine Administration: The EHR or other clinical software system records information about each vaccine administered. The EHR records this information as structured data elements, including, at a minimum: date administered, administering clinician, site of administration (e.g., left arm), immunization type, lot number, manufacturer, Vaccine Information Statement date, quantity of vaccine/dose size and ordering clinician. The system also assures data quality, i.e., data entered are appropriate (e.g., avoid “oral” route for IM vaccines, and assure dose is appropriate for the vaccine).

Evaluation Criteria

EMR Records the following vaccine administration information. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

Ordering Provider	Frank Smith
Entering Organization	Shoreline Pediatrics
Vaccine Event information source	New immunization record (NIP001 00)
Date/Time of Start of Administration	Current Date
Vaccine Administered	hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) ENGERIX-B (NDC 58160-0820-43)
Vaccine 2-D Data Matrix	
Administered Amount (of Vaccine)	0.5
Administered Units (of Measure)	mL
Administration Notes	
Administering Provider	Sandra Molina
Administered-at Location	400 Shoreline Drive, Stamford Connecticut 06901
Lot Number	6332FK26
Substance Expiration Date	12/31/2020
Substance Manufacturer Name	GlaxoSmithKline Biologicals SA (MVX SKB)
Completion Status	Completed (CP)
Route of Administration	Intramuscular (NCIT C28161, HL70162: IM)
Administration Site	Left Deltoid (HL70163 LD)
VFC Eligibility	No
Funding Source	Private

Notes

The EMR does not need to specify a 'new immunization', as long as there is a way to indicate that it is a new immunization within the EMR, this is acceptable (e.g. the default interpretation of the data entry is that it is a new immunization and not historical).

3.2.6. Records Influenza Vaccine administration with VFC eligibility checking

Test Step Type: SUT_MANUAL

The provider records the vaccine administration from a VFC source and alerted that the patient is not VFC eligible.

Test Story

Description

The nurse documents administration for the inactivated influenza vaccine from a VFC source:

- Is alerted that the patient is not eligible for VFC.
- Orders a different non-VFC lot of inactivated influenza vaccine.

Comments

No Comments

Pre-condition

Order is placed for inactivated influenza vaccine.

Post-Condition

The user is notified of vaccine dose ineligibility.

Test Objectives

Notify of Vaccine Dose Ineligibility: The EHR or other clinical software system provides a method for alerting a provider if a vaccine is selected for a patient who is not eligible for the inventory item selected.

Evaluation Criteria

The provider documents a VFC lot to be administered in the EMR. Once notified that the patient is not eligible for the VFC, then a non-VFC lot is selected. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

Entered BY	Sandra Molina
Ordering Provider	Frank Smith
Entering Organization	Shoreline Pediatrics
Vaccine Event information source	New immunization record (NIP001 00)
Value/Text for Vaccine Type	Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161), FLUZONE QUADRIVALENT (NDC 49281-0519-00)
Date/Time of Start of Administration	Current Date
Vaccine Administered	Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161), FLUZONE QUADRIVALENT (NDC 49281-0519-00)
Vaccine 2-D Data Matrix	
VFC lot (not administered)	D8043IN8422
Substance Expiration Date	12/31/2020
Substance Manufacturer Name	Sanofi Pasteur (MVX PMC)
Alert	Patient is not VFC Eligible
Funding Source	Private

The Provider selects a non-VFC Lot:

Vaccine Lot # (administered):	D8043IN8855
Vaccine Expiration Date:	12/31/2020

Notes

No Note

3.2.7. Record Influenza Vaccine administration for Juan Marcel Marina

Test Step Type: SUT_MANUAL

The EMR is able to document all attributes associated with the new vaccine administration.

Test Story

Description

The nurse administers the inactivated influenza vaccine:

- Documents all required information for each vaccine.

Comments

No Comments

Pre-condition

Order is placed for inactivated influenza vaccine.

Post-Condition

The inactivated influenza vaccine administration is recorded in the EMR.

Test Objectives

Record Vaccine Administration: The EHR or other clinical software system records information about each vaccine administered. The EHR records this information as structured data elements, including, at a minimum: date administered, administering clinician, site of administration (e.g., left arm), immunization type, lot number, manufacturer, Vaccine Information Statement date, quantity of vaccine/dose size and ordering clinician. The system also assures data quality, i.e., data entered are appropriate (e.g., avoid “oral” route for IM vaccines, and assure dose is appropriate for the vaccine).

Evaluation Criteria

EMR Records the following vaccine administration information. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

Entered BY	Sandra Molina
Ordering Provider	Frank Smith
Entering Organization	Shoreline Pediatrics
Vaccine Event information source (Administration Notes)	New immunization record (NIP001 00)
Value/Text for Vaccine Type	Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161), FLUZONE QUADRIVALENT (NDC 49281-0519-00)
Date/Time of Start of Administration	Current Date
Vaccine Administered	Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161), FLUZONE QUADRIVALENT (NDC 49281-0519-00)
Vaccine 2-D Data Matrix	
Administered Amount (of Vaccine)	0.25
Administered Units (of Measure)	mL
Administering Provider	Sandra Molina
Administered-at Location	400 Shoreline Drive, Stamford Connecticut 06901
Lot Number	D8043IN8855
Substance Expiration Date	12/31/2020
Substance Manufacturer Name	Sanofi Pasteur (MVX PMC)
Completion Status	CP
Route of Administration	Intramuscular (NCIT C28161, HL70162: IM)
Site	Left Deltoid (HL70163 LD)
VFC Eligibility	No
Funding Source	Private

Notes

The EMR does not need to specify a 'new immunization', as long as there is a way to indicate that it is a new immunization within the EMR, this is acceptable (e.g. the default interpretation of the data entry is that it is a new immunization and not historical).

3.3. Juan Marcel Marina Transmit Immunization Report

Send the Immunization Report to the Immunization Registry (VXU/Z22) for Juan Marcel Marina.

Test Story

Description

Following the vaccinations given during the visit, the EMR transmits an Immunization report to the Immunization Registry using the VXU/Z22. The Vaccination report includes all newly administered vaccines. The report should include vaccines incorrectly recorded in the IIS. The report MAY send the immunizations that the EMR imported from the IIS.

Comments

No Comments

Pre-condition

The vaccines for the visit have been administered.

Post-Condition

The IIS has received the vaccine information (Z22 message).

Test Objectives

Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.

Link Standard Codes to Immunization Data: The EHR or other clinical software system links standard codes (i.e., LOINC for lab tests or evaluation tools, SNOMED CT for conditions or observations, NDC codes for current immunizations, CVX for historical immunizations, appropriate codes for administration site, route, method, etc.) to discrete data elements associated with an immunization.

Note: Testing for NDC codes, CVX for immunizations.

Evaluation Criteria

Evaluation criteria is defined within each test step.

Notes

No Note

3.3.1. Transmit the Immunization Report for Juan Marcel Marina

Test Step Type: SUT_INITIATOR

The EMR sends the Immunization Report to the Immunization Registry (VXU/Z22) for updated vaccination information from the visit. This includes all newly administered vaccines and may include historical information updated in the EMR during the visit. This also includes notification that Varicella is not administered due to history of the disease.

Test Story

Description

Following the vaccinations given during the visit, the EMR transmits an Immunization report to the Immunization Registry using the VXU/Z22. The Vaccination report includes all newly administered vaccines, and an indication that Varicella was not administered due to a history of the disease as evidence of immunity. The Vaccination report also includes an indication that Hepatitis A was not administered due to serological evidence of immunity. The report MAY send the immunizations that the EMR imported from the IIS.

Comments

The Report must include all newly administered vaccines in any order. The report may include the information imported from the IIS.

Pre-condition

The vaccines for the visit have been administered. The clinical information has been documented for Juan Marcel Marina in the Initial Data Load.

Post-Condition

The Immunization Report has been transmitted to the IIS using a valid Z22 VXU in accordance with the test data correctly and without omission.

Test Objectives

Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.

The VXU/Z22 message passes validation using the NIST Immunization VXU Validation Tool (Z22) (context-free). The content of the message correctly reflects the test data (context-based) in accordance with the Test Data Specification and the Message Content.

Link Standard Codes to Immunization Data: The EHR or other clinical software system links standard codes (i.e., LOINC for lab tests or evaluation tools, SNOMED CT for conditions or observations, NDC codes for current immunizations, CVX for historical immunizations, appropriate codes for administration site, route, method, etc.) to discrete data elements associated with an immunization.

Note: Testing for NDC codes, CVX for immunizations.

Evaluation Criteria

The VXU/Z22 message passes validation using the NIST Immunization VXU Validation Tool (Z22) (context-free). The content of the message correctly reflects the test data (context-based) in accordance with the Test Data Specification and the Message Content.

This includes indication that Varicella was not administered due to history of the disease, and an indication that Hepatitis A was not administered due to serological evidence of immunity.

Notes

All NDC coded values are required to use the 11-Character format that includes dashes ('-').

At the time of this publication, PHIN-VADS had not been updated with the latest VIS for Hepatitis B. Manual replacement of the VIS Fully-Encoded Text String (which should indicate the latest value published 8-15-2019: 253088698300005911190815) with the historical value: 253088698300005911181012 will be required until such time that the PHIN-VADS reference file pointed to by the NIST core validator is updated with the latest information.

Test Data Specification**Patient Information**

Element	Data
Patient Name	Juan Marcel Marina
Mother's Maiden Name	Anita Morales
ID Number	123456 987633
Date/Time of Birth	03/04/2018 11:00
Administrative Sex	Male
Patient Address	4623 Standish Way Stamford CT 06903 USA
Local Number	(203)555-1213
Race	White
Ethnic Group	Hispanic or Latino
Multiple Birth Indicator	No
Birth Order	

Immunization Registry Information

Element	Data
Immunization Registry Status	Active
Immunization Registry Status Effective Date	03/04/2018
Publicity Code	Reminder/recall - no calls
Publicity Code Effective Date	03/04/2018
Protection Indicator	No
Protection Indicator Effective Date	

Guardian or Responsible Party

Element	Data
Name	Manuel Marcel Gonzales
Relationship	Father
Address	4623 Standish Way Stamford CT 06903
Phone Number	(203)555-1213

Vaccine Administration Information[*]**Vaccine Administration Information**

Element	Data
Administered Vaccine	Hepatitis B
Date/Time Start of Administration	03/04/2018
Administered Amount	999
Administered Units	
Administration Notes	
Administering Provider	J. Martinez
Substance Lot Number	6332FK34
Substance Expiration Date	12/14/2018
Substance Manufacturer Name	GlaxoSmithKline Biologicals SA
Substance/Treatment Refusal Reason	
Completion Status	Complete
Action Code	Add
Route	Intramuscular
Administration Site	Left Thigh
Entering Organization	Shoreline Hospital
Entered By	Lisa Sirtis
Ordered By	Jane Carter

3.3.2. Receive ACK Z23 from Immunization Registry

Test Step Type: TA_RESPONDER

The Immunization Registry returns a positive acknowledgement message indicating that no errors were found during the course of filing the message.

Test Story

Description
The Immunization Registry returns a positive acknowledgement message indicating that no errors were found during the course of filing the message.
Comments
No Comments
Pre-condition
A VXU message is generated by the EHR.
Post-Condition
The ACK Z23 is received by the EHR.
Test Objectives
Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.
Evaluation Criteria
The acknowledgement message is consumed by the system responsible for the content of the administration message without error.
Notes
Important note regarding the MSH-10 and MSA-2: The NIST acknowledgment message is predefined and is based on the VXU message. Most systems will automatically create the message control Identifier and may require it for importing, linking, and processing the ACK message. The NIST ACK test message can be modified such that MSA-2 matches MSH-10 of the VXU message generated by the system-under test.

3.3.3. Transmit Delete for Vaccine Recorded in Error

Test Step Type: SUT_INITIATOR

The Provider realizes that the notification that the Hepatitis B vaccine 6352FK2 that was not administered was inadvertently documented and transmitted to the registry. A delete notification for the Hepatitis B vaccination administered is transmitted to the Immunization Registry.

Test Story

Description

The provider identifies that the vaccine administration of Hepatitis B for this visit was documented in error. The vaccine was not administered during the visit but was inadvertently documented as administered. A delete notification for the Hepatitis B vaccination administered is transmitted to the Immunization Registry for Juan Marcel Marina.

Comments

No Comments

Pre-condition

The vaccinations for the visit have been administered.

The vaccination report (Z22) has been transmitted to the IIS, including the record of the Hepatitis B vaccination which was inadvertently documented as administered.

.

Post-Condition

The EMR has recorded that the hepatitis B vaccination was documented in error. Juan Marcel Marina's record is updated to reflect that the immunization was not given. The Delete notification for this vaccination has been transmitted to the Immunization Registry.

Test Objectives

Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.

Link Standard Codes to Immunization Data: The EHR or other clinical software system links standard codes (i.e., LOINC for lab tests or evaluation tools, SNOMED CT for conditions or observations, NDC codes for current immunizations, CVX for historical immunizations, appropriate codes for administration site, route, method, etc.) to discrete data elements associated with an immunization.

Note: Testing for NDC codes, CVX for immunizations.

Support for delete functionality.

Evaluation Criteria

Verify that EMR can correct the vaccination documented in error.. Verify that the vaccination record for Juan Marcel Marina for the Hepatitis B vaccination given on the date of the test is marked as invalid.

Verify that a valid Delete notification is transmitted to the Immunization Registry for this vaccination: The VXU/Z22 message passes validation using the NIST Immunization VXU Validation Tool (Z22). The content of the message correctly reflects the test data (context-based) in accordance with the Test Data Specification and the Message Content.

Notes

All NDC coded values are required to use the 11-Character format that includes dashes ('-').

At the time of this publication, PHIN-VADS had not been updated with the latest VIS for Hepatitis B. Manual replacement of the VIS Fully-Encoded Text String (which should indicate the latest value published 8-15-2019: 253088698300005911190815) with the historical value: 253088698300005911181012 will be required until such time that the PHIN-VADS reference file pointed to by the NIST core validator is updated with the latest information.

4. Juana Mariela Gonzales Visit

Infant twin, Juana Mariela Gonzales visits the provider where her immunization history is retrieved from the registry and reconciled with the local information in the medical record to determine vaccines that are due. Vaccinations are ordered and administered. The vaccines are reported to the immunization registry and a vaccine summary is available for the patient.

Notes

4.1. Query the Registry for Juana Mariela Gonzales

EMR Generates a Z44 query to the Immunization Registry to retrieve the Evaluated History and Forecast for Juana Mariela Gonzales.

Test Story

Description

The EMR Generates a Z44 query to the Immunization Registry to retrieve the Evaluated History and Forecast for Juana Mariela Gonzales. Querying the registry will consist of the vendor creating Z44 messages for Juana Mariela Gonzales to be sent to the registry. The response will be processed as part of the 'Display, Reconcile, Import and Update Immunization Information' activity.

Using the Z42 Response to Immunization Registry Query, the EMR displays the Evaluated History and Forecast to the user for reconciliation and update. The vendor will receive information back from the registry and show the ability to view and reconcile, and import the information returned by the registry (NOTE: the Z42 message will be provided either manually, or as part of the tool). This test will also look at the system's ability to view the forecast returned by the registry and create a new forecast after reconciling the information.

Comments

No Comments

Pre-condition

Juana Mariela Gonzales is entered as a patient in the EMR with complete Demographic data, Immunization History Data, and Clinical Data according to the steps in the Juana Mariela Gonzales Initial Data Load'.

Post-Condition

A Z44 Query is generated and submitted to the Immunization Registry/Test tool, and a Z42 response is returned.

Test Objectives

Select New Patient: The system must allow a user to distinguish information about patients with similar names or identifying information in order to select the right patient from the providers' EHR or other clinical software. This information is crucial for identifying and selecting the correct patient. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar sounding names. In order to match patients with those already in the immunization registry, the EHR or other clinical software should have the ability to record the mother's maiden name, whether the patient was part of a multiple birth, and if so, the order of birth (when such information is available). The provider should be aware of how often the protection indicator information must be updated based on local rules.

Request/Receipt of Patient Immunization History: The system sends a request to the public health immunization registry "on demand," or in advance for those with scheduled appointments. The request includes the identifying information the immunization registry needs to match each patient with those in the registry including, if present, the mother's maiden name, a multiple birth indicator, and the birth order. The request also is sent in a pre-determined format the registry can read and interpret (Request Evaluated Immunization History and Forecast (Z44) - HL7 version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5).

Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry.

View Reconciled Immunization Forecast: The EHR or other clinical software system has the ability to re-evaluate and update the immunization forecast using a patient's newly updated immunization history. Forecasts are updated following reconciliation of immunization data contained in the public health immunization registry with immunization data contained in the EHR. Processing the new forecast can be internal to the EHR or it can use an external forecasting service, but should reference the most recent recommendations.

Evaluation Criteria

Evaluation criteria is defined within each test step.

Notes

No Note

4.1.1. Select Patient Juana Mariela Gonzales

Test Step Type: SUT_MANUAL

Select patient Juana Mariela Gonzales, Infant Twin, distinguishing the patient from other patients with similar demographics (twins).

Test Story

Description
Juana Mariela Gonzales is selected as the patient and her record is opened in the EMR.
Comments
No Comments
Pre-condition
Juana Mariela Gonzales Initial Data Load completed.
Post-Condition
Juana Mariela Gonzales is the active working patient in the EMR.
Test Objectives
Select New Patient: The system must allow a user to distinguish information about patients with similar names or identifying information in order to select the right patient from the providers' EHR or other clinical software. This information is crucial for identifying and selecting the correct patient. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar sounding names. In order to match patients with those already in the immunization registry, the EHR or other clinical software should have the ability to record the mother's maiden name, whether the patient was part of a multiple birth, and if so, the order of birth (when such information is available). The provider should be aware of how often the protection indicator information must be updated based on local rules.
Evaluation Criteria

Tester shall verify that the product can distinguish Juana Mariela Gonzales Morales from similar sounding names and her twin using all of the pediatric demographics:

Patient ID (previously listed as "Medicaid Number")	Vendor supplied
Patient ID: Assigning Authority ID (i.e., owning source)/Facility Name	Shoreline Pediatrics
Patient ID: Type (e.g., medical record number, IIS ID)	Vendor supplied
Patient Name: First	Juana
Patient Name: Middle	Mariela
Patient Name: Last	Gonzales
Patient Date of Birth	10/01/2019
Birth Time	11:00
Patient Gender (Administrative Sex)	F
Patient Multiple Birth Indicator	Yes
Patient Birth Order	1
Responsible Person Name: First	Joanna
Responsible Person Name: Middle	Elena
Responsible Person Name: Last	Gonzales
Responsible Person Name: Relationship to Patient	Mother
Mother's Name: First	Joanna
Mother's Name: Middle	Elena
Mother's Name: Last	Gonzales
Mother's Name: Maiden Last	Morales
Patient Address: Street	3321 Standish Way
Patient Address: City	Stamford
Patient Address: State	CT
Patient Address: Country	US
Patient Address: Zipcode	06903
Patient Address: County of Residence	Fairfield
Race	White
Ethnicity	Hispanic or Latino
Birthing Facility Name	Stamford Regional Hospital
Birth Delivery Location Address (BDL)	15 Atlantic Avenue, Stamford Connecticut 06903
Patient Birth State	CT
Patient Primary Language	English
Patient Telephone Number	(203) 555-1214
Patient Telephone Number Type (e.g., home, cell)	cell
Patient E-mail Address	none
Publicity Code	Reminder/recall - no calls (03 HL70215)
Protection Indicator	No
Protection Indicator Effective Date	NA
Immunization Registry Status	NA
Preferred Contact Method	Text

Notes

Patient last name from the hospital returned by the IIS is Morales (the mother's maiden name). The patient last name in the EMR should be Gonzales. This test verifies that the EMR can match the returned record despite the different last name.

4.1.2. Query Registry for vaccination history and forecast for Juana Mariela Gonzales

Test Step Type: SUT_INITIATOR

The EMR generates a Z44 query for immunization history and forecast correctly and without omission according to supplied test data.

Test Story

Description
The provider uses the EMR to query the Immunization Registry for an Evaluated History and Forecast based on information known to the Immunization Registry.
Comments
No Comments
Pre-condition
Juana Mariela Gonzales Initial Data Load is completed. Juana Mariela Gonzales is the active working patient in the EMR.
Post-Condition
The Immunization Registry responds with Evaluated Vaccine History and Forecast for Juana Mariela Gonzales.
Test Objectives
Request/Receipt of Patient Immunization History: The system sends a request to the public health immunization registry "on demand," or in advance for those with scheduled appointments. The request includes the identifying information the immunization registry needs to match each patient with those in the registry including, if present, the mother's maiden name, a multiple birth indicator, and the birth order. The request also is sent in a pre-determined format the registry can read and interpret (Request Evaluated Immunization History and Forecast (Z44) - HL7 version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5).
Evaluation Criteria
Tester shall verify that the vendor can produce a valid Z44 query in accordance with the test data correctly and without omission. Tester shall verify that the data in the message corresponds to the data in the EMR and contains all test data attributes supplied.

4.1.3. View and import response to request for vaccination history for Juana Mariela Gonzales

Test Step Type: TA_RESPONDER

The EMR displays the Immunization History results (Z42) returned in response to the Z44 Query and import them into the EMR.

Test Story

Description

The physician accesses the record for Juana Mariela Gonzales and:

- Accepts the single vaccine in the registry record into the EHR history.

Comments

There is no reconciliation step as there are no historical immunizations in the EMR. All will be imported from the Z42 response.

Pre-condition

A Z44 query has been submitted to the Immunization Registry and a Z42 response is provided back to the EMR and the response is available in the EMR for reconciliation and import.

Post-Condition

Evaluated Immunization History returned from the registry is reconciled and imported into the patient record (Juana Mariela Gonzales).

Test Objectives

Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry.

Evaluation Criteria

1. The EMR displays the information returned from the Immunization Registry according to the Juror Document.

2. The user imports returned vaccinations as follows:

a. Vaccinations Imported:

hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 10/1/2019.

Notes

If the EMR is unable to match and import the previous immunization record, they will need to add the following historical immunization manually:

Vaccine from Practice HepB		
Entered BY	Susan Pike	Y
Ordering Provider	Justin Parker	Y
Entering Organization	Stamford Regional Hospital	Y
Administration Notes (Vaccine Event information source)	New immunization record (NIP001 00)	Y
Date/Time of Start of Administration	10/01/2019	Y
Vaccine Administered	hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08, NDC 58160-0820-43)	Y
Administered Amount (of Vaccine)	0.5	Y
Administered Units (of Measure)	mL	Y
Administering Provider	Susan Pike	Y
Administered-at Location	15 Atlantic Avenue, Stamford, CT, 06903	Y
Lot Number	6332FK34	Y
Substance Expiration Date	12/31/2019	Y
Substance Manufacturer Name	GlaxoSmithKline Biologicals SA (MVX SKB)	Y

DISPLAY VERIFICATION

This Test Case-specific Juror Document provides a checklist for the Tester to use during certification testing for assessing the EHR technology's ability to display required core data elements from the information received in the Evaluated Immunization History and Immunization Forecast Z42 response message. Additional data from the message or from the EHR are permitted to be displayed by the EHR. Grayed-out fields in the Juror Document indicate where no data for the data element indicated were included in the Z42 message for the given Test Case.

The format of this Juror Document is for ease-of-use by the Tester and does not indicate how the EHR display must be designed.

The Evaluated Immunization History and Immunization Forecast data shown in this Juror Document are derived from the Z42 message provided with the given Test Case; equivalent data are permitted to be displayed by the EHR. The column headings are meant to convey the kind of data to be displayed; equivalent labels/column headings are permitted to be displayed by the EHR.

Patient Information		
Element Name	Data	Tester Comment
Patient Identifier		
ID Number	123456	
Assigning Authority		
Namespace ID	MYEHR	
ID Type	MR	
Patient Identifier		
ID Number	987633	
Assigning Authority		
Namespace ID	MYIIS	
ID Type	SR	
Name	Juana Mariela Gonzales	
Date of Birth	10/01/2019	
Sex	Female	
Address 1		
Street	3321 Standish Way	
Other Designation		
City	Stamford	
State	CT	
Zip Code	06903	
Country	USA	
Address Type	L	
Mother's Maiden Name	Joanna Elena Morales	

When displayed in the EHR with the Evaluated Immunization History and Immunization Forecast, these patient demographics data may be derived from either the received immunization message or the EHR patient record. When displaying demographics from the patient record, the EHR must be able to demonstrate a linkage between the demographics in the message (primarily the patient ID in PID-3.1) and the patient record used for display to ensure that the message was associated with the appropriate patient.

Evaluated Immunization History Information		
Element Name	Data	Tester Comment
Entering Organization	Stamford Regional Hospital	
Vaccine Group	Hep B, unspecified formulation

4.1.4. View the vaccination forecast for Juana Mariela Gonzales

Test Step Type: SUT_MANUAL

The EMR displays the current Immunization Forecast to the user for Juana Mariela Gonzales either as returned by the IIS in prior step, or as generated thru any local means.

Test Story

Description

The physician accesses the record for Juana Mariela Gonzales and:

- Views the vaccine forecast (either as provided by the Immunization Registry or as determined through EMR defined methods).

Comments

No Comments

Pre-condition

EMR Vaccine History is imported from the Immunization History returned from the Immunization Registry (previous step 'View and import response to request for vaccination history for Juana Mariela Gonzales').

Post-Condition

A vaccine forecast based upon the imported vaccine history is available to the user.

Test Objectives

View Reconciled Immunization Forecast: The EHR or other clinical software system has the ability to re-evaluate and update the immunization forecast using a patient's newly updated immunization history. Forecasts are updated following reconciliation of immunization data contained in the public health immunization registry with immunization data contained in the EHR. Processing the new forecast can be internal to the EHR or it can use an external forecasting service, but should reference the most recent recommendations.

Evaluation Criteria

1. Tester verifies that the vendor can display the immunization forecast based upon the reconciled vaccination history:

2. Verify that the EMR includes in the vaccine forecast:

Hep B Peds NOS due on 10/31/2019

DTaP due on 11/30/2019

Hib due on 11/30/2019

IPV due on 11/30/2019

Pneumococcal conjugate due on 11/30/2019

Rotavirus due on 11/30/2019

HepA due on 10/1/2020

MMR due on 10/1/2020

Varicella due on 10/1/2019

Influenza, unspecified formulation due on Sept 1, 2020 or later

Notes

NOTE: Influenza does not have an overdue date. For DTaP: Catch-up schedule at this age doesn't really have an overdue date; same with HiB; Jan 14, 2020 is latest date to start rotavirus so depends on the date of the test; For these younger children, the EMR may follow a more detailed schedule based on age at the time of the test. This will result in variation in the forecast for this patient depending upon the date the test is run. Tester should document the rotavirus forecast implemented by the vendor. While there is not an expected recommendation for the earliest date to give for influenza, this may appear in some EMR implementations. Tester should note if this is included.

The due date must be in range for the date shown. Vaccine forecast dates may be plus or minus 10 days to accommodate differences in date handling.

Further variation should be documented in the notable exceptions, but minimally each forecast vaccine must be present.

Rotavirus not due after 14 weeks, so depending on when the test is run, this may be due or not due.

4.2. Juana Mariela Gonzales, Enter Orders and Immunizations

Orders and Immunization events, non-administrations, and alerts presented for current visit.

Test Story

Description

This test will consist of ordering vaccines for the test patients, reviewing any alerts caused by specific scenarios, and documenting vaccinations administered to the patients.

Comments

No Comments

Pre-condition

Juana Mariela Gonzales is entered as a patient in the EMR with complete Demographic data, Immunization History Data, and Clinical Data according to the steps in the 'Juana Mariela Gonzales Initial Data Load'.

Post-Condition

Visit orders are entered in Juana Mariela Gonzales' record.

Test Objectives

Supporting data for documenting contraindications (it could also trigger an alert as a locally configured alert rule)

Modify Antigen Recommendations Based on Active Diagnoses: The system notifies the provider of any conflicts between recommended vaccines in the updated forecast and the patient's current or historical diagnoses.

Record Vaccine Administration Deferral: The EHR or other clinical software system allows a user to enter a reason or reasons why a specific immunization was not given to a patient (e.g., due to contraindication, refusal, etc.). The system also stores that information in a structured way so it can be reported and analyzed as needed.

Evaluation Criteria

Evaluation criteria is defined within each test step.

Notes

No Note

4.2.1. Enter Initial Clinical Information for Juana Mariela

Test Step Type: SUT_MANUAL

The EHR captures structured data indicating that Juana Mariela has a fever in the current visit.

Test Story

Description

The triage nurse enters basic information on Juana Mariela Gonzales - she has a fever (Temperature of 100.8o F).

Comments

No comments

Pre-condition

The EMR has recorded all of the pediatric demographic data in the record created for Juana Mariela Gonzales.

Post-Condition

The clinical record for Juana Mariela Gonzales indicates that she currently has a fever (temperature 100.8oF).

Test Objectives

Supporting data for documenting contraindications (it could also trigger an alert as a locally configured alert rule):

Modify Antigen Recommendations Based on Active Diagnoses: The system notifies the provider of any conflicts between recommended vaccines in the updated forecast and the patient's current or historical diagnoses.

Evaluation Criteria

Evaluation Criteria: Vendor successfully records all clinical data provided with all required attributes indicated by [Y]. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

Vital Signs	Fever of 100.8 (@code LOINC 8310-5 @value 100.8)
Vital Signs Observation Date	Date of current visit
Problems (If vendor uses problems for alert computations, then this should be included.)	Problem list: (Low grade pyrexia (finding) 304213008)
Problem Observation Date	Date of current visit

4.2.2. Enters a deferral for the vaccines due

Test Step Type: SUT_MANUAL

Enters a deferral for vaccines due (Hepatitis B, DTaP, Hib, Pneumococcal conjugate (PCV13) and Rotavirus) due to medical reason, indicating low grade fever, and defers for 1 month.

Test Story

Description

The physician accesses the record for Juana Mariela Gonzales Morales and:

- Enters a deferral for the vaccines due (Hepatitis B, DTaP, Hib, Pneumococcal conjugate (PCV13) and Rotavirus) due to medical reason, indicating low grade fever, and defers for 1 month.

Comments

No Comments

Pre-condition

Prior Immunization History loaded and reconciled from the Immunization Registry. Vaccine forecast is available in the EMR indicating 5 vaccines are due: Hepatitis B, DTaP, Hib, Pneumococcal conjugate (PCV13) and Rotavirus.

Post-Condition

Vaccine deferral is recorded indicating the medical reason of low-grade fever.

Test Objectives

Record Vaccine Administration Deferral: The EHR or other clinical software system allows a user to enter a reason or reasons why a specific immunization was not given to a patient (e.g., due to contraindication, refusal, etc.). The system also stores that information in a structured way so it can be reported and analyzed as needed.

Evaluation Criteria

EMR Records the following vaccine administration information. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

Entered BY	Sandra Molina
Ordering Provider	Frank Smith
Entering Organization	Shoreline Pediatrics
Vaccine Event information source	New immunization record (NIP001 00)
Value/Text for Vaccine Type	hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08)
	diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106)
	Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49)
	pneumococcal conjugate vaccine, 13 valent (CVX 133)
	rotavirus, live, monovalent vaccine (CVX 119)
Date/Time Vaccine not administered was recorded	Current Date
Alert	contraindication of fever
Substance/Treatment Deferral Start Date: Vaccination contraindication/precaution effective date (30946-8 LOINC)	Current Date

Notes

The EMR does not need to specify a 'new immunization', as long as there is a way to indicate that it is a new immunization within the EMR, this is acceptable (e.g. the default interpretation of the data entry is that it is a new immunization and not historical).

4.3. Juana Mariela Gonzales Transmit Immunization Report

Send the Immunization Report to the Immunization Registry (VXU/Z22) for Juana Mariela Gonzales.

Test Story

Description

Following the vaccinations given during the visit, the EMR transmits an Immunization report to the Immunization Registry using the VXU/Z22. The Vaccination report includes deferrals for the vaccines that were due this visit indicating the medical reason. The report MAY send the immunizations that the EMR imported from the IIS.

Comments

No Comments

Pre-condition

The vaccines for the visit have been deferred.

Post-Condition

The IIS has received the vaccine information (Z22 message).

Test Objectives

Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.

Link Standard Codes to Immunization Data: The EHR or other clinical software system links standard codes (i.e., LOINC for lab tests or evaluation tools, SNOMED CT for conditions or observations, NDC codes for current immunizations, CVX for historical immunizations, appropriate codes for administration site, route, method, etc.) to discrete data elements associated with an immunization.

Note: Testing for NDC codes, CVX for immunizations.

Evaluation Criteria

Evaluation criteria is defined within each test step.

Notes

No Note

4.3.1. Transmit the Immunization Report for Juana Mariela Gonzales

Test Step Type: SUT_INITIATOR

The EMR sends the Immunization Report to the Immunization Registry (VXU/Z22) for updated vaccination information from the visit. This includes the vaccine deferral and may include historical information updated in the EMR during the visit.

Test Story

Description

Following the visit, the EMR transmits an Immunization report to the Immunization Registry using the VXU/Z22. The Vaccination report includes the vaccine deferrals. The report MAY send the immunizations that the EMR imported from the IIS.

Comments

The Report must include all vaccine deferrals recorded in the EMR in any order. The report may include the information imported from the IIS.

Pre-condition

The vaccines for the visit have been administered.

Post-Condition

The Immunization Report has been transmitted to the IIS using a valid Z22 VXU in accordance with the test data correctly and without omission.

Test Objectives

Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.

Link Standard Codes to Immunization Data: The EHR or other clinical software system links standard codes (i.e., LOINC for lab tests or evaluation tools, SNOMED CT for conditions or observations, NDC codes for current immunizations, CVX for historical immunizations, appropriate codes for administration site, route, method, etc.) to discrete data elements associated with an immunization.

Note: Testing for NDC codes, CVX for immunizations.

Evaluation Criteria

The VXU/Z22 message passes validation using the NIST Immunization VXU Validation Tool (Z22) (context-free). The content of the message correctly reflects the test data (context-based) in accordance with the Test Data Specification and the Message Content. The message must contain all deferrals recorded in the EMR. Current Date is expected for the Non-Administration date and deferral date.

Notes

All NDC coded values are required to use the 11-Character format that includes dashes ('-').

Test Data Specification**Patient Information**

Element	Data
Patient Name	Juana Mariela Gonzales
Mother's Maiden Name	Joanna Morales
ID Number	123456 987633
Date/Time of Birth	10/01/2019 11:00
Administrative Sex	Female
Patient Address	3321 Standish Way Stamford CT 06903 USA
Local Number	(203)555-1214
Race	White
Ethnic Group	Hispanic or Latino
Multiple Birth Indicator	Yes
Birth Order	1

Immunization Registry Information

Element	Data
Immunization Registry Status	Active
Immunization Registry Status Effective Date	10/01/2019
Publicity Code	Reminder/recall - no calls
Publicity Code Effective Date	10/01/2019
Protection Indicator	No
Protection Indicator Effective Date	

Guardian or Responsible Party

Element	Data
Name	Joanna Elena Gonzales
Relationship	Mother
Address	3321 Standish Way Stamford CT 06903
Phone Number	(203)555-1214

Vaccine Administration Information[*]**Vaccine Administration Information**

Element	Data
Administered Vaccine	Hepatitis B
Date/Time Start of Administration	10/01/2019
Administered Amount	0.5
Administered Units	
Administration Notes	
Administering Provider	Susan Pike
Substance Lot Number	6332FK34
Substance Expiration Date	12/31/2019
Substance Manufacturer Name	GlaxoSmithKline Biologicals SA
Substance/Treatment Refusal Reason	
Completion Status	Complete
Action Code	Add
Route	Intramuscular
Administration Site	Left Thigh
Entering Organization	Stamford Regional Hospital
Entered By	Susan Pike
Ordered By	Justin Parker

Vaccine Administration Information

Element	Data
Administered Vaccine	hepatitis B vaccine, unspecified formulation
Date/Time Start of Administration	10/31/2019
Administered Amount	999

4.3.2. Receive ACK Z23 from Immunization Registry

Test Step Type: TA_RESPONDER

The Immunization Registry returns a positive acknowledgement message indicating that no errors were found during the course of filing the message.

Test Story

Description
The Immunization Registry returns a positive acknowledgement message indicating that no errors were found during the course of filing the message.
Comments
No Comments
Pre-condition
A VXU message is generated by the EHR.
Post-Condition
The ACK Z23 is received by the EHR.
Test Objectives
Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.
Evaluation Criteria
The acknowledgement message is consumed by the system responsible for the content of the administration message without error.
Notes
Important note regarding the MSH-10 and MSA-2: The NIST acknowledgment message is predefined and is based on the VXU message. Most systems will automatically create the message control Identifier and may require it for importing, linking, and processing the ACK message. The NIST ACK test message can be modified such that MSA-2 matches MSH-10 of the VXU message generated by the system-under test.

5. Juana Maria Gonzales Visit

Infant twin, Juana Maria Gonzales Morales visits the provider where her immunization history is retrieved from the registry and reconciled with the local information in the medical record to determine vaccines that are due. Vaccinations are ordered and administered. The vaccines are reported to the immunization registry and a vaccine summary is available for the patient.

Post-Condition
Test Objectives
Evaluation Criteria
Notes

5.1. Query the Registry for Juana Maria Gonzales.

EMR Generates a Z44 query to the Immunization Registry to retrieve the Evaluated History and Forecast for Juana Maria Gonzales.

Test Story

Description

The EMR Generates a Z44 query to the Immunization Registry to retrieve the Evaluated History and Forecast for Juana Maria Gonzales. Querying the registry will consist of the vendor creating Z44 messages for Juana Maria Gonzales to be sent to the registry. The response will be processed as part of the 'Display, Reconcile, Import and Update Immunization Information' activity.

Using the Z42 Response to Immunization Registry Query, the EMR displays the Evaluated History and Forecast to the user for reconciliation and update. The vendor will receive information back from the registry and show the ability to view and reconcile, and import the information returned by the registry (NOTE: the Z42 message will be provided either manually, or as part of the tool). This test will also look at the system's ability to view the forecast returned by the registry and create a new forecast after reconciling the information.

Comments

No Comments

Pre-condition

Juana Mariela Gonzales is entered as a patient in the EMR with complete Demographic data, Immunization History Data, and Clinical Data according to the steps in the Juana Mariela Gonzales Initial Data Load.

Post-Condition

A Z44 Query is generated and submitted to the Immunization Registry/Test tool, and a Z42 response is returned.

Test Objectives

Select New Patient: The system must allow a user to distinguish information about patients with similar names or identifying information in order to select the right patient from the providers' EHR or other clinical software. This information is crucial for identifying and selecting the correct patient. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar sounding names. In order to match patients with those already in the immunization registry, the EHR or other clinical software should have the ability to record the mother's maiden name, whether the patient was part of a multiple birth, and if so, the order of birth (when such information is available). The provider should be aware of how often the protection indicator information must be updated based on local rules.

Request/Receipt of Patient Immunization History: The system sends a request to the public health immunization registry "on demand," or in advance for those with scheduled appointments. The request includes the identifying information the immunization registry needs to match each patient with those in the registry including, if present, the mother's maiden name, a multiple birth indicator, and the birth order. The request also is sent in a pre-determined format the registry can read and interpret (Request Evaluated Immunization History and Forecast (Z44) - HL7 version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5).

Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry.

View Reconciled Immunization Forecast: The EHR or other clinical software system has the ability to re-evaluate and update the immunization forecast using a patient's newly updated immunization history. Forecasts are updated following reconciliation of immunization data contained in the public health immunization registry with immunization data contained in the EHR. Processing the new forecast can be internal to the EHR or it can use an external forecasting service, but should reference the most recent recommendations.

Evaluation Criteria

Evaluation criteria is defined within each test step.

Notes

No Note

5.1.1. Select Patient Juana Maria Gonzales

Test Step Type: SUT_MANUAL

Select patient Juana Maria Gonzales, Infant Twin, distinguishing the patient from other patients with similar demographics (twins).

Test Story

Description
Juana Maria Gonzales is selected as the patient and her record is opened in the EMR.
Comments
No Comments
Pre-condition
Juana Maria Gonzales Initial Data Load completed.
Post-Condition
Juana Maria Gonzales is the active working patient in the EMR.
Test Objectives
Select New Patient: The system must allow a user to distinguish information about patients with similar names or identifying information in order to select the right patient from the providers' EHR or other clinical software. This information is crucial for identifying and selecting the correct patient. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar sounding names. In order to match patients with those already in the immunization registry, the EHR or other clinical software should have the ability to record the mother's maiden name, whether the patient was part of a multiple birth, and if so, the order of birth (when such information is available). The provider should be aware of how often the protection indicator information must be updated based on local rules.
Evaluation Criteria

Tester shall verify that the product can distinguish Juana Maria Gonzales from similar sounding names and her twin using all of the pediatric demographics:

Patient ID (previously listed as "Medicaid Number")	Vendor supplied
Patient ID: Assigning Authority ID (i.e., owning source)/Facility Name	Shoreline Pediatrics
Patient ID: Type (e.g., medical record number, IIS ID)	Vendor supplied

5.1.2. Query Registry for vaccination history and forecast too many matches found response

Test Step Type: SUT_INITIATOR

Vendor SHALL be able to Generate a Z44 Query correctly and without omission according to supplied test data.

Test Story

Description The provider uses the EMR to query the Immunization Registry for an Evaluated History and Forecast based on information known to the Immunization Registry. This query will result in an error that too many matches are found.
Comments While the query is identical, the response to this step will be that no persons are found. No demographic changes are requested for this step as the error trigger is specific to the test step.
Pre-condition Juana Maria Gonzales Initial Data Load is completed. Juana Maria Gonzales is the active working patient in the EMR.
Post-Condition The Immunization Registry responds with Evaluated Vaccine History and Forecast for Juana Maria Gonzales.
Test Objectives Request/Receipt of Patient Immunization History: The system sends a request to the public health immunization registry "on demand," or in advance for those with scheduled appointments. The request includes the identifying information the immunization registry needs to match each patient with those in the registry including, if present, the mother's maiden name, a multiple birth indicator, and the birth order. The request also is sent in a pre-determined format the registry can read and interpret (Request Evaluated Immunization History and Forecast (Z44) - HL7 version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5). Setup step to test error handling: Test the capability of the EHR-S to process a response message that returns no persons found and to provide an indication to the end user.
Evaluation Criteria Tester shall verify that the vendor can produce a valid Z44 query in accordance with the test data correctly and without omission. Tester shall verify that the data in the message corresponds to the data in the EMR and contains all test data attributes supplied.

5.1.3. Error Handling - Too many matches found

Test Step Type: TA_RESPONDER

The EMR receives a response from the registry query that too many persons are found. The EMR notifies the user/clinician.

Test Story

Description The EMR processes notifies the user that there were too many matches found in response to the query the Immunization Registry for an Evaluated History and Forecast.
Comments The sending (querying) system will need to accept a response indicating that too many matches were found.
Pre-condition A Z44 query has been submitted to the Immunization Registry and a Z42 response is provided back to the EMR and the response is available in the EMR for reconciliation and import.
Post-Condition The Immunization Registry responds with a message indicating too many matches are found. The EMR has notified the user.
Test Objectives Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry. Tests error handling: Test the capability of the EHR-S to process a response message that returns too many matches found and to provide an indication to the end user.
Evaluation Criteria The tester verifies that the user/clinician is notified of no match. The EHR shall display a notification indicating that the query for an Evaluated Immunization History and Immunization Forecast is complete but too many matching records were found for the person in the query.

5.1.4. Query Registry for vaccination history and forecast no persons found response

Test Step Type: SUT_INITIATOR

Vendor SHALL be able to Generate a Z44 Query correctly and without omission according to supplied test data.

Test Story

Description The provider uses the EMR to query the Immunization Registry for an Evaluated History and Forecast based on information known to the Immunization Registry. This query will result in an error that no persons are found.
Comments This step is a repeat of Step 2: Query Registry for vaccination history and forecast for Juana Maria Gonzales in order to set up the error-checking response for 'No Persons Found'. While the query is identical, the response to this step will be that no persons are found. No demographic changes are requested for this step as the error trigger is specific to the test step.
Pre-condition Juana Maria Gonzales Initial Data Load is completed. Juana Maria Gonzales is the active working patient in the EMR.
Post-Condition The Immunization Registry responds with Evaluated Vaccine History and Forecast for Juana Maria Gonzales.
Test Objectives Request/Receipt of Patient Immunization History: The system sends a request to the public health immunization registry "on demand," or in advance for those with scheduled appointments. The request includes the identifying information the immunization registry needs to match each patient with those in the registry including, if present, the mother's maiden name, a multiple birth indicator, and the birth order. The request also is sent in a pre-determined format the registry can read and interpret (Request Evaluated Immunization History and Forecast (Z44) - HL7 version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5). Tests error handling: Test the capability of the EHR-S to process a response message that returns no persons found and to provide an indication to the end user.
Evaluation Criteria Tester verifies that the message has been created and submitted in the test plan to trigger the error handling response in the next step.
Notes Query step is the same as Step 2: Query Registry for vaccination history and forecast for Juana Maria Gonzales. No new requirements tested.

5.1.5. Error Handling - No persons found

Test Step Type: TA_RESPONDER

The EMR receives a response from the registry query that no persons are found. The EMR notifies the user/clinician.

Test Story

Description The EMR processes notifies the user that there were no persons found in response to the query the Immunization Registry for an Evaluated History and Forecast.
Comments The sending (querying) system will need to accept a response indicating that no matches were found.
Pre-condition A Z44 query has been submitted to the Immunization Registry and a Z42 response is provided back to the EMR and the response is available in the EMR for reconciliation and import.
Post-Condition The Immunization Registry responds with a message indicating no person record is found. The EMR has notified the user.
Test Objectives Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry. Tests error handling: Test the capability of the EHR-S to process a response message that returns no persons found and to provide an indication to the end user.
Evaluation Criteria The tester verifies that the user/clinician is notified of no match. The EHR shall display a notification indicating that the query for an Evaluated Immunization History and Immunization Forecast is complete but no matching records were found for the person in the query.
Notes No Note

5.1.6. Query Registry for vaccination history and forecast for Juana Maria Gonzales

Test Step Type: SUT_INITIATOR

Vendor SHALL be able to Generate a Z44 Query correctly and without omission according to supplied test data.

Test Story

Description
The provider uses the EMR to query the Immunization Registry for an Evaluated History and Forecast based on information known to the Immunization Registry.
Comments
This step is a repeat of Step 2: Query Registry for vaccination history and forecast for Juana Maria Gonzales in order to set up the response for the history and forecast that will be imported in the following step.
Pre-condition
Juana Maria Gonzales Initial Data Load is completed.
Juana Maria Gonzales is the active working patient in the EMR.
Post-Condition
The Immunization Registry responds with Evaluated Vaccine History and Forecast for Juana Maria Gonzales.
Test Objectives
Request/Receipt of Patient Immunization History: The system sends a request to the public health immunization registry "on demand," or in advance for those with scheduled appointments. The request includes the identifying information the immunization registry needs to match each patient with those in the registry including, if present, the mother's maiden name, a multiple birth indicator, and the birth order. The request also is sent in a pre-determined format the registry can read and interpret (Request Evaluated Immunization History and Forecast (Z44) - HL7 version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5).
Evaluation Criteria
Tester verifies that the message has been created and submitted in the test plan to trigger the error handling response in the next step.
Notes
Query step is the same as Step 2: Query Registry for vaccination history and forecast for Juana Maria Gonzales. No new requirements tested.

5.1.7. View and import response to request for vaccination history for Juana Maria Gonzales

Test Step Type: TA_RESPONDER

The EMR displays the Immunization History results (Z42) returned in response to the Z44 Query and import them into the EMR.

Test Story

Description

The physician accesses the record for Juana Maria Gonzales and:

- Accepts the single vaccine in the registry record into the EHR history.

Comments

There is no reconciliation step as there are no historical immunizations in the EMR. All will be imported from the Z42 response.

Pre-condition

A Z44 query has been submitted to the Immunization Registry and a Z42 response is provided back to the EMR and the response is available in the EMR for reconciliation and import.

Post-Condition

Evaluated Immunization History returned from the registry is reconciled and imported into the patient record (Juana Maria Gonzales).

Test Objectives

Request/Receive Patient Immunization Data and Identify Source: The EHR stores immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry.

Evaluation Criteria

1. The EMR displays the information returned from the Immunization Registry according to the Juror Document.
2. The user imports the vaccination given and the date administered returned from the immunization registry as follows:

a. Vaccinations Imported:

hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 10/1/2019

Notes

The message returns 'BG2' in the first name of the patient as the first immunization was given at the time of birth before the patient's first name was selected. The EMR should be able to import this record into the patient record despite the apparent name mismatch retaining the original name, Juana Maria Gonzales.

If the EMR is unable to match and import the previous immunization record, they will need to add the following historical immunization manually. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

Vaccine from Practice HepB		
Entered BY	Susan Pike	Y
Ordering Provider	Justin Parker	Y
Entering Organization	Stamford Regional Hospital	Y
Administration Notes (Vaccine Event information source)	New immunization record (NIP001 00)	Y
Date/Time of Start of Administration	10/01/2019	Y

Juror Document

Evaluated Immunization History and Immunization Forecast		
Test Case ID	Query the Registry for Juana Maria Gonzales.	
Juror ID		
Juror Name		
HIT System Tested		
Inspection Date/Time		
Inspection Settlement (Pass/Fail)	Pass	Fail
Reason Failed		
Juror Comments		

DISPLAY VERIFICATION

This Test Case-specific Juror Document provides a checklist for the Tester to use during certification testing for assessing the EHR technology's ability to display required core data elements from the information received in the Evaluated Immunization History and Immunization Forecast Z42 response message. Additional data from the message or from the EHR are permitted to be displayed by the EHR. Grayed-out fields in the Juror Document indicate where no data for the data element indicated were included in the Z42 message for the given Test Case.

The format of this Juror Document is for ease-of-use by the Tester and does not indicate how the EHR display must be designed.

The Evaluated Immunization History and Immunization Forecast data shown in this Juror Document are derived from the Z42 message provided with the given Test Case; equivalent data are permitted to be displayed by the EHR. The column headings are meant to convey the kind of data to be displayed; equivalent labels/column headings are permitted to be displayed by the EHR.

Patient Information		
Element Name	Data	Tester Comment
Patient Identifier		
ID Number	123456	
Assigning Authority		
Namespace ID	MYEHR	
ID Type	MR	
Patient Identifier		
ID Number	987633	
Assigning Authority		
Namespace ID	MYIIS	
ID Type	SR	
Name	BG2 Morales	
Date of Birth	10/01/2019	
Sex	Female	
Address 1		
Street	3321 Standish Way	
Other Designation		
City	Stamford	
State	CT	
Zip Code	06903	
Country	USA	
Address Type	L	
Mother's Maiden Name	Joanna Elena Morales	

When displayed in the EHR with the Evaluated Immunization History and Immunization Forecast, these patient demographics data may be derived from either the received immunization message or the EHR patient record. When displaying demographics from the patient record, the EHR must be able to demonstrate a linkage between the demographics in the message (primarily the patient ID in PID-3.1) and the patient record used for display to ensure that the message was associated with the appropriate patient.

Evaluated Immunization History Information		
Element Name	Data	Tester Comment
Entering Organization	Stamford Regional Hospital	
Vaccine Group	Hep B, unspecified formulation	
Vaccine Administered	Hepatitis B	
Refusal Reason		
Date/Time Administration-Start	10/01/2019	
Date/Time Administration-End	10/01/2019	
Administered Amount	0.5	
Administered Units of Measure	mL	
Route of Administration	IM	
Administration Site	Left Thigh	
Substance Manufacturer Name	GlaxoSmithKline Biologicals SA	
Administration Notes		
Administering Provider		
Name	Susan Pike	
ID Number		
Administered-at Location		
Facility ID	SRH	
Street Address	15 Atlantic Avenue	
Other Designation		
City	Stamford	
State	CT	
Zip Code	06903	
Country		
Valid Dose	YES	
Validity Reason		
Completion Status*	Complete	
Dose Number in Series	1	
Number of Doses in Series	3	
Immunization Series Name		
Status in Immunization Series		
Immunization Schedule Used	ACIP	

* "Completion Status" refers to the status of the dose of vaccine administered on the indicated date and may be interpreted as "Dose Status". A status of "Complete" means that the vaccine dose was "completely administered" as opposed to "partially administered".

5.1.8. View the vaccination forecast for Juana Maria Gonzales

Test Step Type: SUT_MANUAL

The EMR displays the current Immunization Forecast to the user for Juana Maria Gonzales either as returned by the IIS in prior step, or as generated thru any local means.

Test Story

Description

The physician accesses the record for Juana Maria Gonzales and:

- Views the vaccine forecast (either as provided by the Immunization Registry or as determined through EMR defined methods).

Comments

No Comments

Pre-condition

EMR Vaccine History is imported from the Immunization History returned from the Immunization Registry (previous step 'View and import response to request for vaccination history for Juana Maria Gonzales').

Post-Condition

A vaccine forecast based upon the imported vaccine history is available to the user.

Test Objectives

View Reconciled Immunization Forecast: The EHR or other clinical software system has the ability to re-evaluate and update the immunization forecast using a patient's newly updated immunization history. Forecasts are updated following reconciliation of immunization data contained in the public health immunization registry with immunization data contained in the EHR. Processing the new forecast can be internal to the EHR or it can use an external forecasting service, but should reference the most recent recommendations.

Evaluation Criteria

1. Tester verifies that the vendor can display the immunization forecast based upon the reconciled vaccination history:
2. Verify that the EMR includes in the vaccine forecast:

Hep B Peds NOS due on 10/31/2019
DTaP due on 11/30/2019
Hib due on 11/30/2019
IPV due on 11/30/2019
Pneumococcal conjugate due on 11/30/2019
Rotavirus due on 11/30/2019
HepA due on 10/1/2020
MMR due on 10/1/2020
Varicella due on 10/1/2020
influenza, unspecified formulation due on Sept 1, 2020 or later

Notes

NOTE: Influenza does not have an overdue date. For DTaP: catchup schedule at this age doesn't really have an overdue date; same with HiB; Jan 14, 2020 is latest date to start rotavirus so depends on the date of the test; For these younger children, the EMR may follow a more detailed schedule based on age at the time of the test. This will result in variation in the forecast for this patient depending upon the date the test is run. Tester should document the rotavirus forecast implemented by the vendor. While there is not an expected recommendation for the earliest date to give for influenza, this may appear in some EMR implementations. Tester should note if this is included.

The due date must be in range for the date shown. Vaccine forecast dates may be plus or minus 10 days to accommodate differences in date handling.

Further variation should be documented in the notable exceptions, but minimally each forecast vaccine must be present.

5.2. Juana Maria Gonzales, Enter Orders and Immunizations

Orders and Immunization events, non-administrations, and alerts presented for current visit.

Test Story

Description

This test will consist of ordering vaccines for the test patients, reviewing any alerts caused by specific scenarios, and documenting vaccinations administered to the patients.

Comments

No Comments

Pre-condition

Juana Maria Gonzales is entered as a patient in the EMR with complete Demographic data, Immunization History Data, and Clinical Data according to the steps in the 'Juana Maria Gonzales Initial Data Load'.

Post-Condition

Visit orders are entered in Juana Maria Gonzales' record.

Test Objectives

Supporting data for error handling tests.

Record Vaccine Administration: The EHR or other clinical software system records information about each vaccine administered. The EHR records this information as structured data elements, including, at a minimum: date administered, administering clinician, site of administration (e.g., left arm), immunization type, lot number, manufacturer, Vaccine Information Statement date, quantity of vaccine/dose size and ordering clinician. The system also assures data quality, i.e., data entered are appropriate (e.g., avoid "oral" route for IM vaccines, and assure dose is appropriate for the vaccine).

Evaluation Criteria

Evaluation criteria is defined within each test step.

Notes

No Note

5.2.1. Record Combo Vaccine administration

Test Step Type: SUT_MANUAL

The EMR is able to document all attributes associated with the new vaccine administration.

Test Story

Description

The nurse administers the DTaP-hepatitis B and poliovirus vaccine:

- Documents all required information for the vaccine.

Comments

No Comments

Pre-condition

Order is placed for DTaP-hepatitis B and poliovirus vaccine.

Post-Condition

The DTaP-hepatitis B and poliovirus vaccination is recorded in the EMR.

Test Objectives

Record Vaccine Administration: The EHR or other clinical software system records information about each vaccine administered. The EHR records this information as structured data elements, including, at a minimum: date administered, administering clinician, site of administration (e.g., left arm), immunization type, lot number, manufacturer, Vaccine Information Statement date, quantity of vaccine/dose size and ordering clinician. The system also assures data quality, i.e., data entered are appropriate (e.g., avoid “oral” route for IM vaccines, and assure dose is appropriate for the vaccine).

Evaluation Criteria

The EMR Records the following vaccine administration information. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

Entered BY	Sandra Molina
Ordering Provider	Frank Smith
Entering Organization	Shoreline Pediatrics
Vaccine Event information source	New immunization record (NIP001 00)
Date/Time of Start of Administration	Current Date
Vaccine Administered	DTaP-hepatitis B and poliovirus vaccine (CVX 110) Pediarix (NDC 58160-0811-43)
2-D Data Matrix	
GTIN	10358160811439
Administered Amount (of Vaccine)	0.5
Administered Units (of Measure)	mL
Administration Notes	
Administering Provider	Sandra Molina
Administered-at Location	400 Shoreline Drive, Stamford Connecticut 06901
Lot Number	6559FK32
Substance Expiration Date	12/31/2020
Substance Manufacturer Name	GlaxoSmithKline Biologicals SA (MVX SKB)
Completion Status	Completed (CP)
Route of Administration	Intramuscular (NCIT C28161, HL70162: IM)
Administration Site	Left Deltoid (HL70163 LD)
VFC Eligibility	No
Funding Source	Private

Notes

The EMR does not need to specify a 'new immunization', as long as there is a way to indicate that it is a new immunization within the EMR, this is acceptable (e.g. the default interpretation of the data entry is that it is a new immunization and not historical).

5.3. Juana Maria Gonzales Transmit Immunization Report - Error Handling

This Test Case verifies the ability of the EMR to handle errors and warnings in response to the Send the Immunization Report to the Immunization Registry (VXU/Z22) transaction for Juana Maria Gonzales.

Test Story

Description
Following the vaccinations given during the visit, the EMR transmits an Immunization report to the Immunization Registry using the VXU/Z22. The Vaccination report includes all newly administered vaccines. The report MAY send the immunizations that the EMR imported from the IIS.
This transaction will result in an error or warning from the IIS.
Comments
No Comments
Pre-condition
The vaccines for the visit have been administered.
Post-Condition
The IIS has received the vaccine information (Z22 message) and issued a Z23 response with an error or warning.
Test Objectives
Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.
Verify that the EMR is able to receive and display the error or warning response from the IIS.
Link Standard Codes to Immunization Data: The EHR or other clinical software system links standard codes (i.e., LOINC for lab tests or evaluation tools, SNOMED CT for conditions or observations, NDC codes for current immunizations, CVX for historical immunizations, appropriate codes for administration site, route, method, etc.) to discrete data elements associated with an immunization.
Note: Testing for NDC codes, CVX for immunizations.
Evaluation Criteria
Evaluation criteria is defined within each test step.
Notes
No Note

5.3.1. Transmit the Immunization Report for Juana Maria Gonzales - Fatal Error Handling

Test Step Type: SUT_INITIATOR

The EMR sends the Immunization Report to the Immunization Registry (VXU/Z22) for updated vaccination information from the visit. This will result in a fatal error from the IIS to assess the EMR ability to receive and display the error.

Test Story

Description

Following the visit, the EMR transmits an Immunization report to the Immunization Registry using the VXU/Z22. The report MAY send the immunizations that the EMR imported from the IIS. This will result in a warning from the IIS to assess the EMR ability to receive and display the error.

Comments

The Report must include all vaccine deferrals recorded in the EMR in any order. The report may include the information imported from the IIS.

Pre-condition

The vaccines for the visit have been administered.

Post-Condition

The Immunization Report has been transmitted to the IIS using a valid Z22 VXU in accordance with the test data correctly and without omission.

Test Objectives

Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.

Setup to verify that the EMR is able to receive and display the error response from the IIS.

Link Standard Codes to Immunization Data: The EHR or other clinical software system links standard codes (i.e., LOINC for lab tests or evaluation tools, SNOMED CT for conditions or observations, NDC codes for current immunizations, CVX for historical immunizations, appropriate codes for administration site, route, method, etc.) to discrete data elements associated with an immunization.

Note: Testing for NDC codes, CVX for immunizations.

Evaluation Criteria

The VXU/Z22 message passes validation using the NIST Immunization VXU Validation Tool (Z22) (context-free). The content of the message correctly reflects the test data (context-based) in accordance with the Test Data Specification and the Message Content.

Notes

The protection indicator for Juana Maria is 'Yes'. If this setting restricts the EMR from transmitting to the IIS, then the protection indicator for Juana Maria may be modified to 'No' for the purpose of this transaction.

All NDC coded values are required to use the 11-Character format that includes dashes ('-').

Test Data Specification

Patient Information

Element	Data
Patient Name	Juana Maria Gonzales
Mother's Maiden Name	Joanna Morales
ID Number	123456 987633
Date/Time of Birth	10/01/2019 11:15
Administrative Sex	Female
Patient Address 1	3321 Standish Way Stamford CT 06903 USA
Patient Address 2	325 Shoreline Drive Stamford CT 06901
Local Number	(203)555-1214
Race	White
Ethnic Group	Hispanic or Latino
Multiple Birth Indicator	Yes
Birth Order	2

Immunization Registry Information

Element	Data
Immunization Registry Status	Active
Immunization Registry Status Effective Date	10/01/2019
Publicity Code	Reminder/recall - no calls
Publicity Code Effective Date	10/01/2019
Protection Indicator	Yes
Protection Indicator Effective Date	10/01/2019

Guardian or Responsible Party

Element	Data
Name	Joanna Elena Gonzales
Relationship	Mother
Address	3321 Standish Way Stamford CT 06903
Phone Number	(203)555-1214

Vaccine Administration Information[*]**Vaccine Administration Information**

Element	Data
Administered Vaccine	Hepatitis B
Date/Time Start of Administration	10/01/2019
Administered Amount	0.5
Administered Units	
Administration Notes	
Administering Provider	Susan Pike
Substance Lot Number	6332FK34
Substance Expiration Date	12/31/2019
Substance Manufacturer Name	GlaxoSmithKline Biologicals SA
Substance/Treatment Refusal Reason	
Completion Status	Complete
Action Code	Add
Route	Intramuscular
Administration Site	Left Thigh
Entering Organization	Stamford Regional Hospital
Entered By	Susan Pike
Ordered By	Justin Parker

Vaccine Administration Information

Element	Data
Administered Vaccine	DTaP-HepB-IPV
Date/Time Start of Administration	10/31/2019
Administered Amount	0.5
Administered Units	
Administration Notes	New immunization record
Administering Provider	Sandra Molina
Substance Lot Number	6559FK32
Substance Expiration Date	12/31/2020
Substance Manufacturer Name	GlaxoSmithKline Biologicals SA
Substance/Treatment Refusal Reason	
Completion Status	Complete
Action Code	Add
Route	Intramuscular
Administration Site	Left Deltoid
Entering Organization	Shoreline Pediatrics
Entered By	Sandra Molina
Ordered By	Frank Smith

Element	Data
Document Type	Multiple Vaccines VIS
VIS Presentation Date	10/31/2019
vaccine fund pgm elig cat	Not VFC eligible
Vaccine funding source	Private

5.3.2. Receive ACK Z23 Fatal Error - CVX Code

Test Step Type: TA_RESPONDER

The Immunization Registry returns a fatal error message indicating a table mapping error for the CVX code submitted was found during the course of filing the message.

Test Story

Description

The Immunization Registry returns a fatal error message indicating a table mapping error for the CVX code submitted was found during the course of filing the message.

Comments

No Comments

Pre-condition

A VXU message is generated by the EHR.

Post-Condition

The ACK Z23 is received by the EHR.

Test Objectives

Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.

Error Handling Support for a fatal error returned by the IIS, and the ability of the EMR to display a notification of this error to the user.

Evaluation Criteria

The acknowledgement error message is consumed by the system responsible for the content of the administration message.

The error returned is visible in the EMR.

Notes

Important note regarding the MSH-10 and MSA-2: The NIST acknowledgment message is predefined and is based on the VXU message. Most systems will automatically create the message control Identifier and may require it for importing, linking, and processing the ACK message. The NIST ACK test message can be modified such that MSA-2 matches MSH-10 of the VXU message generated by the system-under test.

5.3.3. Transmit the Immunization Report for Juana Maria Gonzales - warning handling

Test Step Type: SUT_INITIATOR

The EMR sends the Immunization Report to the Immunization Registry (VXU/Z22) for updated vaccination information from the visit. This will result in a warning from the IIS to assess the EMR ability to receive and display the warning.

Test Story

Description Following the visit, the EMR transmits an Immunization report to the Immunization Registry using the VXU/Z22. This will result in multiple warnings from the IIS to assess the EMR ability to receive and display the error.
Comments The Report must include the newly administered vaccine recorded in the EMR. The report may include the information imported from the IIS.
Pre-condition The vaccines for the visit have been administered.
Post-Condition The Immunization Report has been transmitted to the IIS using a valid Z22 VXU in accordance with the test data correctly and without omission.
Test Objectives Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries. Set up to verify that the EMR is able to receive and display the multiple warning response from the IIS. Link Standard Codes to Immunization Data: The EHR or other clinical software system links standard codes (i.e., LOINC for lab tests or evaluation tools, SNOMED CT for conditions or observations, NDC codes for current immunizations, CVX for historical immunizations, appropriate codes for administration site, route, method, etc.) to discrete data elements associated with an immunization. Note: Testing for NDC codes, CVX for immunizations.
Evaluation Criteria The VXU/Z22 message passes validation using the NIST Immunization VXU Validation Tool (Z22) (context-free). The content of the message correctly reflects the test data (context-based) in accordance with the Test Data Specification and the Message Content.
Notes The protection indicator for Juana Maria is 'Yes'. If this setting restricts the EMR from transmitting to the IIS, then the protection indicator for Juana Maria may be modified to 'No' for the purpose of this transaction. All NDC coded values are required to use the 11-Character format that includes dashes ('-').

VIS Presentation Date	10/31/2019
vaccine fund pgm elig cat	Not VFC eligible
Vaccine funding source	Private

5.3.4. Receive ACK Z23 Warning - Invalid Value

Test Step Type: TA_RESPONDER

The Immunization Registry returns a warning message indicating an invalid administration site code submitted was found during the course of filing the message.

Test Story

Description

The Immunization Registry returns a warning message indicating an unrecognized administration site code submitted was found during the course of filing the message.

Comments

No Comments

Pre-condition

A VXU message is generated by the EHR.

Post-Condition

The ACK Z23 is received by the EHR.

Test Objectives

Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.

Error Handling Support for a warning returned by the IIS, and the ability of the EMR to display a notification of this warning to the user.

Evaluation Criteria

The acknowledgement warning message is consumed by the system responsible for the content of the administration message.

The warning returned is visible in the EMR.

Notes

Important note regarding the MSH-10 and MSA-2: The NIST acknowledgment message is predefined and is based on the VXU message. Most systems will automatically create the message control Identifier and may require it for importing, linking, and processing the ACK message. The NIST ACK test message can be modified such that MSA-2 matches MSH-10 of the VXU message generated by the system-under test.

5.3.5. Transmit the Immunization Report for Juana Maria Gonzales - Multiple warning handling

Test Step Type: SUT_INITIATOR

The EMR sends the Immunization Report to the Immunization Registry (VXU/Z22) for updated vaccination information from the visit. This will result in multiple warnings from the IIS to assess the EMR ability to receive and display the warnings.

Test Story

Description Following the visit, the EMR transmits an Immunization report to the Immunization Registry using the VXU/Z22. This will result in multiple warnings from the IIS to assess the EMR ability to receive and display the warnings.
Comments The Report must include the newly administered vaccine recorded in the EMR. The report may include the information imported from the IIS.
Pre-condition The vaccines for the visit have been administered.
Post-Condition The Immunization Report has been transmitted to the IIS using a valid Z22 VXU in accordance with the test data correctly and without omission.
Test Objectives Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries. Set up to verify that the EMR is able to receive and display the multiple warning response from the IIS. Link Standard Codes to Immunization Data: The EHR or other clinical software system links standard codes (i.e., LOINC for lab tests or evaluation tools, SNOMED CT for conditions or observations, NDC codes for current immunizations, CVX for historical immunizations, appropriate codes for administration site, route, method, etc.) to discrete data elements associated with an immunization. Note: Testing for NDC codes, CVX for immunizations.
Evaluation Criteria The VXU/Z22 message passes validation using the NIST Immunization VXU Validation Tool (Z22) (context-free). The content of the message correctly reflects the test data (context-based) in accordance with the Test Data Specification and the Message Content.
Notes The protection indicator for Juana Maria is 'Yes'. If this setting restricts the EMR from transmitting to the IIS, then the protection indicator for Juana Maria may be modified to 'No' for the purpose of this transaction. All NDC coded values are required to use the 11-Character format that includes dashes ('-').

5.3.6. Receive ACK Z23 Multiple Warnings

Test Step Type: TA_RESPONDER

The Immunization Registry returns a message with multiple warnings for invalid administration site codes submitted found during the course of filing the message.

Test Story

Description

The Immunization Registry returns a message with multiple warnings indicating unrecognized administration site codes submitted were found during the course of filing the message.

Comments

No Comments

Pre-condition

A VXU message is generated by the EHR.

Post-Condition

The ACK Z23 is received by the EHR.

Test Objectives

Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's newly administered or newly identified immunization history to public health immunization registries.

Error Handling Support for multiple warnings returned by the IIS, and the ability of the EMR to display a notification of these warnings to the user.

Evaluation Criteria

The acknowledgement warning message is consumed by the system responsible for the content of the administration message.

The multiple warnings returned is visible in the EMR.

Notes

Important note regarding the MSH-10 and MSA-2: The NIST acknowledgment message is predefined and is based on the VXU message. Most systems will automatically create the message control Identifier and may require it for importing, linking, and processing the ACK message. The NIST ACK test message can be modified such that MSA-2 matches MSH-10 of the VXU message generated by the system-under test.

This information will be automatically supplied by the System	

6. Cohort Report

This test will consist of generating a cohort report to list all patients who are due or overdue for immunizations showing all overdue immunizations with the associated due/overdue dates.

Test Story

Description
Comments
Pre-condition
Post-Condition
Test Objectives
Evaluation Criteria
Notes

6.1. Due and Overdue Immunizations

List all patients who are due or overdue for immunizations showing all overdue immunizations.

Test Story

Description

The provider periodically uses the EMR to identify the cohort of patients that are due or overdue for immunizations along with their contact information in order to send reminder notifications to the patients/parents.

Comments

No Comments

Pre-condition

Initial Data Load completed with demographic data, vaccination history, and clinical history. Historical Vaccination reconciled and loaded into the EMR. The vaccine forecast is available to the EMR.

Post-Condition

The Cohort report for all patients that are due or overdue for immunizations is available to the provider through the EMR.

Test Objectives

Produce Population-Level Report: The EHR or other clinical system generates aggregate, population-level reports based on known patient immunization data.

Evaluation Criteria

Evaluation criteria is defined within each test step.

Notes

No Note

6.1.1. Produce Overdue Immunizations Cohort Report

Test Step Type: SUT_MANUAL

The provider uses the EMR to create a report for all patient vaccinations overdue with the contact information.

Test Story

Description

The provider periodically uses the EMR to identify the cohort of patients that are due or overdue for immunizations along with their contact information in order to send reminder notifications to the patients/parents.

Comments

No Comments

Pre-condition

Initial Data Load completed with demographic data, vaccination history, and clinical history. Historical Vaccination reconciled and loaded into the EMR. The vaccine forecast is available to the EMR.

Post-Condition

The Cohort report for all patients that are due or overdue for immunizations is available to the provider through the EMR.

Test Objectives

Produce Population-Level Report: The EHR or other clinical system generates aggregate, population-level reports based on known patient immunization data.

Evaluation Criteria

The following patient information is provided on the cohort report:

Patient Name	Juana Mariana Vazquez
Preferred Contact Method	Phone

Notes

7.1. View Inventory

Demonstrates the ability to view updated inventory supply.

Test Story

Description
The provider reviews the available inventory following vaccine administrations used during the day.
Comments
No Comments
Pre-condition
Vaccine inventory entered. Vaccines administered for Juana Mariana Vazquez, Juan Marcel Marina, and Juana Maria Gonzales.
Post-Condition
Available vaccine inventory displayed.
Test Objectives
Update Vaccine Inventory from Patient Dosage Administration: The system updates the vaccine inventory to ensure the correct count of remaining available vaccine inventory.
Evaluation Criteria
Evaluation criteria is defined within each test step.
Notes
No Note

7.1.1. View updated vaccine inventory

Test Step Type: SUT_MANUAL

Demonstrates the ability to view updated inventory supply.

Test Story

Description

The provider reviews the available inventory following vaccine administrations used during the day.

Comments

No Comments

Pre-condition

Vaccine inventory entered.

Vaccines administered for Juana Mariana Vazquez, Juan Marcel Marina, and Juana Maria Gonzales.

Post-Condition

Available vaccine inventory displayed.

Test Objectives

Update Vaccine Inventory from Patient Dosage Administration: The system updates the vaccine inventory to ensure the correct count of remaining available vaccine inventory.

Evaluation Criteria

The EMR inventory shows (minimally):

1.

Manufacturer:	Sanofi Pasteur Inc.
NDC:	49281-0519-00
Product Name:	FLUZONE QUADRIVALENT
Lot#:	8L4B3521
Expiration Date:	12/31/2020
GTIN:	00349281519000
Vaccine source:	VFC
Quantity:	11 Vials (or doses)

2.

Manufacturer:	Sanofi Pasteur Inc.
NDC:	49281-0519-00
Product Name:	FLUZONE QUADRIVALENT
Lot#:	D8043IN8422
Expiration Date:	12/31/2020
GTIN:	00349281519000
Vaccine source:	VFC
Quantity:	15 Vials (or doses)

3.

Manufacturer:	Sanofi Pasteur Inc.
NDC:	49281-0519-00
Product Name:	FLUZONE QUADRIVALENT
Lot#:	D8043IN8855
Expiration Date:	12/31/2020
GTIN:	00349281519000
Vaccine source:	Non-VFC
Quantity:	11 Vials (or doses)

4.

Manufacturer:	GlaxoSmithKline Biologicals SA
---------------	--------------------------------

NDC:	58160-0820-43
Product Name:	ENGERIX-B
Lot#:	6332FK18
Expiration Date:	6/15/2019
GTIN:	10358160820431
Vaccine source:	Non-VFC
Quantity:	18 Syringes (or doses)

5.

Manufacturer:	GlaxoSmithKline Biologicals SA
NDC:	58160-0820-43
Product Name:	ENGERIX-B
Lot#:	6332FK26
Expiration Date:	12/31/2020
GTIN:	10358160820431
Vaccine source:	Non-VFC
Quantity:	19 Syringes (or doses)

6.

Manufacturer:	GlaxoSmithKline Biologicals SA
NDC:	58160-0811-43
Product Name:	Pediarix
Lot#:	6559FK32
Expiration Date:	12/31/2020
GTIN:	10358160811439
Vaccine source:	Non-VFC
Quantity:	15 Syringes (or doses)

7.2. Produce Inventory Report of Remaining Stock

Demonstrates the ability to generate a stock report that lists all vaccines in stock, sorted by expiration date and another sorted by source (private vs VFC stock).

Test Story

Description
The provider periodically uses the EMR to review inventory of remaining stock. The report may be sorted by expiration date or funding source.
Comments
No Comments
Pre-condition
Initial Data Load completed with demographic data, vaccination history, and clinical history. Vaccines administered in previous test steps have been deprecated from stock record.
Post-Condition
The Cohort report for all inventory stock is available to the provider through the EMR, sorted by funding source and expiration date.
Test Objectives
Produce Vaccine History Report: The EHR or other clinical software system generates inventory reports of remaining stock. The reports can be sorted by expiration date and source (e.g., private or guarantee program).
Evaluation Criteria
Evaluation criteria is defined within each test step.
Notes

Pre-condition

Initial Data Load completed with demographic data, vaccination history, and clinical history. Vaccines administered in previous test steps have been deprecated from stock record.

Post-Condition

The Cohort report for all inventory stock is available to the provider through the EMR, sorted by expiration date.

Test Objectives

Produce Vaccine History Report: The EHR or other clinical software system generates inventory reports of remaining stock. The reports can be sorted by expiration date and source (e.g., private or guarantee program).

Evaluation Criteria

The following information is (minimally) provided on the inventory report, sorted by expiration date:

1.

Manufacturer:	GlaxoSmithKline Biologicals SA
NDC:	58160-0820-43
Product Name:	ENGERIX-B
Lot#:	6332FK18
Expiration Date:	6/15/2019
GTIN:	10358160820431
Vaccine source:	Non-VFC
Quantity:	18 Syringes (or doses)

2.

Manufacturer:	Sanofi Pasteur Inc.
NDC:	49281-0519-00
Product Name:	FLUZONE QUADRIVALENT
Lot#:	8L4B3521
Expiration Date:	12/31/2020
GTIN:	00349281519000
Vaccine source:	VFC
Quantity:	11 Vials (or doses)

3.

Manufacturer:	Sanofi Pasteur Inc.
NDC:	49281-0519-00
Product Name:	FLUZONE QUADRIVALENT
Lot#:	D8043IN8422
Expiration Date:	12/31/2020
GTIN:	00349281519000
Vaccine source:	VFC

Quantity:	15 Vials (or doses)
-----------	---------------------

4.

Manufacturer:	Sanofi Pasteur Inc.
NDC:	49281-0519-00
Product Name:	FLUZONE QUADRIVALENT
Lot#:	D8043IN8855
Expiration Date:	12/31/2020
GTIN:	00349281519000
Vaccine source:	Non-VFC
Quantity:	11 Vials (or doses)

5.

Manufacturer:	GlaxoSmithKline Biologicals SA
NDC:	58160-0820-43
Product Name:	ENGERIX-B
Lot#:	6332FK26
Expiration Date:	12/31/2020
GTIN:	10358160820431
Vaccine source:	Non-VFC
Quantity:	19 Syringes (or doses)

6.

Manufacturer:	GlaxoSmithKline Biologicals SA
NDC:	58160-0811-43
Product Name:	Pediarix
Lot#:	6559FK32
Expiration Date:	12/31/2020
GTIN:	10358160811439
Vaccine source:	Non-VFC
