Notes

Tester should document how quantity is displayed and what is present (e.g. volume, # doses).

Because the influenza season may not align with the test plan execution, the most current influenza vaccine may not be present.

A GTIN for Pfizer-BioNTech COVID-19 Vaccine (PURPLE CAP) (NDC: NDC 59267-1000-01) had not yet been assigned at the time this test plan was generated. A GTIN was generated for the purpose of this test according to GS1 standards and may be updated in the future should this be changed in IIS: NDC Lookup Crosswalk published by CDC. The lack of an assigned GTIN also means a GS1 DataMatrix (2D barcode) was not created for this test plan. Vendors must therefore hand enter this vaccine information.
