Description

See test case steps for details.

Pre-condition

Daniela Jennifer Wyatt is the practitioner.

Test Objectives

Alerts a user to the following data entry issues:
1. patient born in the future (DOB (PID-7) after TODAY)
2. patient DOB too old (Today-DOB>150 years)
3. patient vaccinated before birth (IZ Administered (RXA-3/4) before DOB (PID-7))

Evaluation Criteria

The SUT makes user aware of the following data entry impossibilities or improbabilities:

Step 9.1.1 Attests: Alert a user when data entered indicates the patient is born in the future (DOB (PID-7) after TODAY)

Step 9.1.2 Attests: Alert a user when a date of birth (PID-30) is entered which indicates a patient is more than 150 years of age (TODAY-DOB > 150 Years)

Step 9.1.3 - Requirement: Shall Alert a user when data entered indicates the patient received a vaccine before birth (DOD (PID-30) before DOB (PID-7))

Vaccine administered before birth: (RXA-3/4) before DOB (PID-7)
